

How to Create a Customized IIPP

Available In:

- English
- Spanish
- Videoconferencing

Reduce Costs and Risks Associated with Injuries and Illnesses!

Your Injury and Illness Prevention Program must be a written plan that includes procedures *and is put into practice.*

What trainees will learn:

- Management commitment/assignment of responsibilities
- Safety communications system with employees
- System for assuring employee compliance with safe work practices
- Scheduled inspections/evaluation system
- Accident investigation
- Procedures for correcting unsafe/ unhealthy conditions
- Safety and health training and instruction
- Recordkeeping and documentation

How this training will benefit your company and employees:

An effective IIPP improves the safety and health in your workplace and reduces costs by good management and employee involvement and will:

- Fully involve all employees, supervisors, and management
- Identify the specific workplace hazards employees are exposed to
- Correct identified hazards in an appropriate and timely manner and
- Provide effective training

If you would like to reduce the costs and risks associated with workplace injuries and illnesses, you need to address safety and health right along with production. Setting up an Injury and Illness Prevention Program helps you do this. In developing the program, you identify what must be done to promote the safety and health of your employees and worksite, and you outline policies and procedures to achieve your safety and health goals.

This training can be conducted for 8 hours or more. Onsite training may be customized to meet your business needs.
