

Lean Six Sigma Green Belt

Available In:

- English
- Spanish
- Videoconferencing

Continuous Improvement Process Training

This Lean Six Sigma Green Belt course is designed to develop and transform employees into Lean experts who will then be responsible for problem-solving and improving quality in any type of company using basic to advance statistical analytical tools as part of their regular work responsibilities.

What trainees will learn:

- The skills and knowledge necessary to identify and lead Lean Six Sigma problem solving and quality improvement events and projects
- How to correctly implement strategic and tactical tools using the DMAIC methodology

How this training will benefit your company and employees:

Employees who complete this course will contribute to a company by playing a supportive role in the larger Lean Six Sigma Process Improvement projects. These employees understand the concepts used to collect critical information on processes and allow other Green Belts to gain knowledge and experience in the problem-solving process. Everyone's comprehension of the process is an integral part of improvement methodology. Green Belt-certified trained individuals have the job of locating, controlling and watching out for possible monetary loss in any area of the company, and propose counter measure applications and processes while reporting this kind of information to Black Belts and key stakeholders residing within the company.

Onsite training may be customized to meet your business needs.

ABOUT MODERN CLERISY
