

Softball Field

Project: Softball Field at SBVC

Square Feet: 108,000 sq. Ft.

Current Project Budget: \$9.9M

Delivery Method: Design Bid Build

Architect: PBK Architects

Project Status: Completed

Anticipated Start of Construction: Jan 2022

Anticipated Project Completion: Jun 2024

Local Hire: 15%

Project Goal: San Bernardino Valley College is set to improve its softball program with a dedicated, on-campus home facility that offers a premier student-athlete experience, serving as a modern showcase venue for the entire campus community.

Project Description

- This transformative project will construct a brand-new softball complex on the SBVC campus, featuring a permanent stadium with raised seating for spectators, batting cages, bullpens, lighting for night games, and other first-class amenities. After years of playing at an off-site park, the softball team will finally have a state-of-the-art home venue tailored to their needs.
- The modern complex, funded by Measure CC bonds, will elevate the program by providing optimal facilities for training, competition, and recruiting top talent.
- The softball stadium will be a showcase addition to SBVC's athletic facilities.
