

3
4 SUSTAINABILITY
5

6 As a member of the greater San Bernardino community, the San Bernardino Community College District
7 plays a critical role in the educational and economic health of the region. As part of this responsibility, the
8 District recognizes the importance of addressing sustainability in its daily operations to provide
9 stewardship of the environment, as well as to provide students with the knowledge and skills to succeed
10 in the green economy.

11 The District will provide a leadership role in sustainability through several means:

- 12 • Developing a District/College sustainability plan which concisely identifies the vision for
13 sustainability, guiding principles and actions necessary to implement the plan.
- 14 • Actively engaging faculty, students and staff in preparation and implementation of the
15 sustainability program.
- 16 • Building greater awareness of sustainability within the colleges and within the greater San
17 Bernardino community.
- 18 • Working with other agencies on potential funding opportunities.
