

Jerry Lewis Emergency Training Center Opens

Funded by a \$12 million grant from the Federal Aviation Administration (FAA), as well as Measure P funds, the Jerry Lewis San Bernardino Emergency Training Center opened in June. The center is located on former Norton AFB and is being used for training fire fighting personnel nationwide in the proper tactics for fighting aircraft fires and proper rescue techniques for such emergencies.

The new center includes an administration building with classrooms and utilizes a state-of-the-art computerized live propane simulator. Propane fuel is used for fires so there will be no environmental hazards.

The live simulator, approved by the Federal Aviation Administration, has two major props — a Fuel Spill Burn Area (FSBA) and a Specialized Aircraft Fire Fighting Trainer (SAFT).

Artificial intelligent (AI) computer programming controls the 125 foot diameter fuel spill simulator. The computer senses when the trainee, using proper fire suppression techniques, defeats the fire, and it slowly reduces the flame to extinction. The SAFT simulator, a 737 sized mock-up, provides students the experience of interior fire attack training. The simulation represents typical emergency situations that a firefighter may encounter in the event of an aircraft fire emergency. Crafton Hills College, working jointly with the San Bernardino County Fire Department, will oversee the educational component of the program.

The training center was named after United States Congressman Jerry Lewis, representing California's 41st District.

CERTIFICATION OF BOND EXPENDITURES

The SBCCD Vice Chancellor of Fiscal Services certifies that the bond proceeds for FY06 were expended only for the purposes set forth in the ballot measure and that no bond proceeds were used for any teacher or administrative salaries or other operating expenses.

The expenditures for FY06 will be audited by our external auditors, Eadie & Payne, and the audit findings will be presented to the Oversight Committee in early 2007.

MEASURE P CITIZENS' OVERSIGHT COMMITTEE REPORT TO THE COMMUNITY 2005-2006

BACKGROUND ON MEASURE P

The voters of the San Bernardino Community College District approved Measure P, a \$190 million bond measure designed to improve safety and infrastructure at San Bernardino Valley College and Crafton Hills College. Measure P also will construct new classroom buildings and training centers.

Because Measure P was an election under Proposition 39, the District was obliged to establish a Citizens' Oversight Committee in order to satisfy the accountability requirements of Prop. 39. Regulated by the Ralph M. Brown Public Meetings Act, the Committee reviews expenditures reports to ensure that a) bond proceeds are expended only for the purpose set forth in the ballot measure; and b) no bond proceeds are used for any teacher or administrative salaries or operating expenses.

OVERSIGHT COMMITTEE FORMED

Applications for the Citizens' Oversight Committee were made available to representative groups within the district, as well as to the public at large. A 12-member Citizens' Oversight Committee was formed, with representatives of businesses, senior citizens, taxpayers, district support groups and students. The committee reports to the District's Governing Board. District staff members or individuals in a financial relationship with the District may not serve on the Committee. Members serve one or two-year terms and receive no compensation.

In addition to reviewing bond expenditures, the Committee is responsible for informing the public concerning the District's expenditure of bond proceeds and for presenting to the Board, in public session, an annual report.

2005-06 OVERSIGHT COMMITTEE ACTIVITIES

The Oversight Committee met regularly during the year to review bond expenditures and get an update on bond projects. They met on July 19 for the annual organizational meeting at the District Office, November 15 at Crafton Hills College and again on March 7 at the District Office. Committee members also participated in various campus activities including ribbon cuttings and master plan presentations.

OVERSIGHT COMMITTEE MEMBERS

Winston Carl, Senior Citizen Organization
Lois J. Carson, SBVC Foundation
Graciano Gomez, Business Organization
Dr. Elizabeth Harris, Community-at-Large
Elizabeth Holzhauser, Community-at-Large
Dr. Ronald O. Kibby, Community-at-Large
Wilfrid C. Lemann, KVCR Foundation
Lenore B. Manak, Tax Payer Organization
Wesley C. McDaniel, Community-at-Large
Dennis Partain II, Student
David E. Raley, CHC Foundation
Laurie Stalnaker, Business/Labor Organization

BOND EXPENDITURE UPDATE

San Bernardino Valley College began an extensive construction program in 2002 because it was discovered that the San Jacinto fault line crosses diagonally through the campus, compromising the structural integrity of seven buildings. In an effort to rectify the problem, Valley College received federal and state funding to replace the structures located within a 200-foot wide fault zone. Five new buildings were constructed to replace the seven that needed to be demolished.

Because federal and state funding was not adequate for this major construction project, almost all of the first issuance (\$50 million) of Measure P bond monies was allocated to SBVC projects. The first issuance was received on May 15, 2003.

The second issuance was for \$20 million and was received on February 26, 2004. Almost all of these funds were allocated to Crafton Hills College for major energy updates, maintenance/safety projects and developing a Master Plan.

LEVERAGING OF BOND FUNDS

The District makes every effort to leverage Measure P funds with state and federal funds in order to stretch the tax payers' dollars. The first issuance of \$50 million was leveraged with over \$55 million in state and federal funds.

The second issuance of \$20 million was enhanced with almost \$17 million in state and federal funds.

The District is currently in the pipeline for additional state monies to support new buildings at both campuses.

The San Bernardino Community College District (SBCCD) consists of San Bernardino Valley College and Crafton Hills College in Yucaipa. The SBCCD is an equal opportunity employer and is committed to an active Non-Discrimination Program. Sexual harassment and discrimination, which is based on race, color, religion, ancestry, national origin, age, sex, marital status, persons with disabilities and medical conditions (cancer related, cured or rehabilitated), Vietnam Era Veterans or sexual orientation is prohibited under the district policy.

PROJECT STATUS REPORT & MEASURE P FUNDS EXPENDED

SITE	PROJECT NAME and APPROXIMATE MEASURE P \$\$	STATUS	
CHC	Master Planning, Infrastructure & Program Management (\$4.2 million)	Programming for Infrastructure, Natatorium, Learning Resource Center and Humanities are underway	
	Old Bookstore Remodel (\$ 1 million)	Completed June 2006	
	FAA Fire Training Facility (\$150,000)	Completed June 2006	
	Energy Updates (\$6.5 million)	Completed	
	Parking Lot Additions (\$293,764)	Completed	
	Infrastructure Updates (\$2.2 million)	Completed	
DISTRICT	Applied Technologies Training Center (ATTC) (\$2.25 million)	Under Construction, Completion due May 2007	
SBVC	1. Learning Resources Center	Occupied	
	2. Life and Health Science	Occupied but closeouts remain	
	3. Administration	#1-11= \$50.375 million	Occupied but closeouts remain
	4. Campus Center		Occupied but closeouts remain
	5. Art Center	Due to occupy August 2006	
	6. Business and Technical (Seismic upgrade)	Completed	
	7. Auditorium Seismic & Electrical (Seismic upgrade)	Completed	
	8. Demolition of Administration, Library and Life Science	Completed	
	9. Parkway & Parking Lot #1, Phase I	Underway. Completion due October 2006	
	10. Old Campus Center and Art Demolition	Bid award at July 2006 Board. Demolition completion, February 2007	
	11. Parkway & Parking Lot #10, Phase 2	Bid award November 2006. Construction completion, August 2007	
	Auditorium Renovation (\$1.667 million)	Completed	
	Child Development Center (\$4.5 million)	Completion due August 2006	
	Master Planning (\$918,000)	Core committee meetings and work are underway	
Student Health Services (\$1.4 million)	Bid awarded for modulars. Construction completion, July 2007		
Football Field Refurbishment (\$918,000)	Completed		

2005-2006 SAN BERNARDINO VALLEY COLLEGE HIGHLIGHTS

New Football Playing Surface

San Bernardino Valley College dedicated a new \$1 million state-of-art all-weather football playing surface at a special pre-game ceremony on Saturday, September 10, 2005. The new surface rivals many Division I collegiate football fields.

A unique feature of the surface is an intricate irrigation system that was installed beneath the turf. The system keeps the field cool during extreme temperatures.

Demolition of "Classics"

SBVC Library

It cost \$313,835 to build them and \$1.1 million to tear them down. There's no doubt that things have changed over the last 79 years. After all, gasoline was only 6.5 cents per gallon in 1927 – the same year construction began on

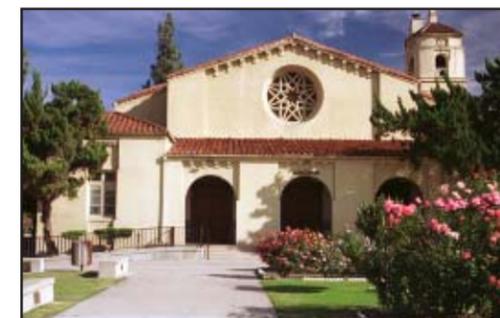

San Bernardino Valley College's first three buildings known as "The Classics." On September 26, 2005, the four-month process was launched to demolish the old library, administration and life science buildings. All three mission style structures have been replaced by new "Millennium-look" buildings and two others are expected to be completed by next spring.

Before the structures could be leveled, the interior of the buildings had to be free of hazardous substances such as asbestos. Plastic coverings were affixed to entrances and windows of the old buildings to ensure that potential hazardous particles and dust were captured inside the buildings and placed in containers for shipment to waste sites. Once that process was completed, the buildings were demolished from the roof down, leaving a space the size of the Rose Bowl in the middle of the campus.

Extreme Makeover for SBVC Auditorium

Entertainment legends Bob Hope, Dorothy Lamour, Jerry Colonna, Desi Arnaz and his orchestra, Edgar Bergen, Charlie McCarthy and Dinah Shore performed in the historic San Bernardino Valley College Auditorium nearly 60 years ago. The impressive mission-style structure remains the icon of the 79-year-old campus and it re-

opened its doors in January 2006 after a two-year extreme makeover to renovate, shore-up and restore a piece of

irreplaceable history.

While the 650-seat venue was spared from demolition, it still had its share of major repairs and

restoration. Seismic retrofitting entailed the placement of metal bars some eight-feet into the foundation extending the full length of all of the walls in addition to the clock tower. The ceiling was fitted with metal and wood braces and the electrical wiring was completely replaced.

The old seats were removed and recovered. New light fixtures have been placed in the foyer, brighter lighting now illuminates the main auditorium from the handcrafted architecture of the ceiling, and fresh paint is applied to the massive pillars that outline the seating.

The Auditorium reopened in April 2006 with a stage production of *To Kill a Mockingbird*.

New Campus Center Dedicated

A new 37,000 square-foot Campus Center was formally dedicated at Valley College on May 3, 2006.

The Campus Center is home of SBVC's food services and restaurant management program, a bookstore, student dining area, campus police, student activities, student government, a cyber lounge, planning and research, the CalWORKS program, professional development, and institutional advancement.

SBVC Campus Center

SBVC Begins New Master Plan

In the fall of 2005, SBVC selected Steinberg Architects to develop and implement a master plan for the college that addresses the three remaining buildings scheduled for demolition—North Hall, Chemistry and Physical Sciences. These structures will be replaced by three new buildings—Media/Communications, East Hall and Chemistry/Physical Science buildings—and constitute the remaining Measure P projects for SBVC.

Steinberg Architects is working closely with campus committees to clearly define the goals and the vision for the master plan, including landscaping.

2005-2006 CRAFTON HILLS COLLEGE HIGHLIGHTS

10-Year Master Plan Developed

Late last year, after an extensive search, CHC chose Steinberg Architects to develop a master plan and design work for the campus.

Goals of CHC Master Plan

Student Life

- To recruit and retain students at Crafton Hills College through meeting their academic and campus life expectations.
- To support growth in student enrollment with the expansion of campus facilities and the development of technical capabilities.
- To create a student-centered college that facilitates graduation and matriculation in keeping with students' busy lifestyles.
- To increase the number of "hot spots" throughout campus to activate student life.

Faculty and Staff Life

- To provide an atmosphere that fosters and supports faculty and staff interaction, faculty training in new technologies and the development of new instructional programs.

Community

- To enhance the identity of Crafton Hills College in the community.
- To create an inviting environment that promotes community involvement.
- To provide programs and facilities that meet the needs of the community.

Access

- To provide easy access to information, resources and services at the college.
- To provide student services any time, any place, any pace.
- To improve the navigation, accessibility and identification of the campus during all hours of operation.

Campus Environment

- To create state-of-the-art buildings that responsibly address and accommodate the projected growth for the college while maintaining park-like atmosphere and architectural integrity of the campus.
- To create a physical framework and infrastructure that will allow Crafton Hills College the flexibility to grow and adapt as technology and instructional methods evolve.

The proposed plan for the next 10 years includes:

- The construction of a General Education (formerly labeled Humanities) Building and Learning Resource Center on the peninsula between the Performing Arts Center and the Student Services B Building
- The establishment of a community area that would include a natatorium (pool area)
- The "clustering" of the different academic programs in their own respective areas
- The expansion of the Performing Arts Center
- Setting up outdoor tables that take advantage of the views creating outdoor spaces that accommodate a diversity of academic, social, and community uses
- Increasing the number and diversity of trees, adding special features such as water and art, and diversifying the plants
- Creating a hierarchy of paths and outdoor spaces that clarify campus entry points and orient visitors to the academic, administrative, and recreational and social spaces
- Community recreation facility, athletic field, and parking lot planned for after 2012
- The addition of parking structures on each end of campus, one by 2012 and the other after 2012
