Message from the Chancellor

“

Together, we are writing the next chapter of the San Bernardino Community College District and our region. We are entering the next decade more resilient and even more committed to transforming the narrative of our community through greater educational, social, and economic opportunities. This living document reflects our strategic intent and guides our path ahead.

The San Bernardino Community College District has an opportunity – unique in California and the United States – to demonstrate how we embrace our diversity, tap into the energy of our youth, and partner with our community to rise above challenges and bring about social innovation.

We are building upon our 90-year history – working to open our doors to more students, working to modernize our buildings and classrooms, and working with policy-makers and entrepreneurs to grow our economic impact and future workforce.

That's what this Districtwide Support Services Strategic Plan is about. It's grounded in action to drive forward the collective aspirations and vision of faculty, students, alumni, staff, and community leaders for where we want to be in the next five years and beyond. Their dedication and countless hours refining this plan will pay dividends today and for our future generations, and I am grateful for their contributions.

We are committed to taking action now because we cannot wait to build a better future for the Inland Empire. And together, we will.

”

Planning Framework

Planning Framework

INTENT OF THE DISTRICTWIDE SUPPORT SERVICES STRATEGIC PLAN

The San Bernardino Community College District (SBCCD) *Districtwide Support Services Strategic Plan* (the Plan) is a comprehensive document that establishes a clear direction for the District in supporting each College's future of academics and student support under changing internal and external conditions. Quantitative and qualitative data indicators are analyzed to rationally guide the planning process. Additionally, the Plan is directed by core values and goals within other College and District-wide plans.

While the *Districtwide Support Services Strategic Plan* is intended to provide a direction of how the District may support each College over the next five years (2017-2022), it is not a rigid script with little deviation. This document is designed to identify challenges facing the District and provide recommendations on how the District may support each College's strategic directions and goals. A *Districtwide Support Services Strategic Plan* is a living document that should be reviewed and updated regularly. Thus, this document is an evolving description of the District's needs and, although past performance data can greatly inform future growth, emerging regional issues, as well as unforeseen events, can alter a community's path.

Planning Framework

PURPOSES OF THE DISTRICTWIDE SUPPORT SERVICES STRATEGIC PLAN

The main purposes of this *Districtwide Support Services Strategic Plan* are as follows:

- › Provide a framework within which the District can work in coordinated fashion with each College toward achieving long-term strategic directions and goals.
- › Integrate planning, not only with the Colleges and the State Chancellor's Office, but also with other District planning documents and the work of planning and consultation committees.
- › Receive input from all stakeholders (faculty, staff, students, and the community) to inform the District's current situation and future planning decisions.
- › Serve as an instrument to promote the District and communicate its strengths and capabilities to its community and other constituent groups.
- › Guide further planning and decision-making at all levels, and remain a living, strategically useful document.

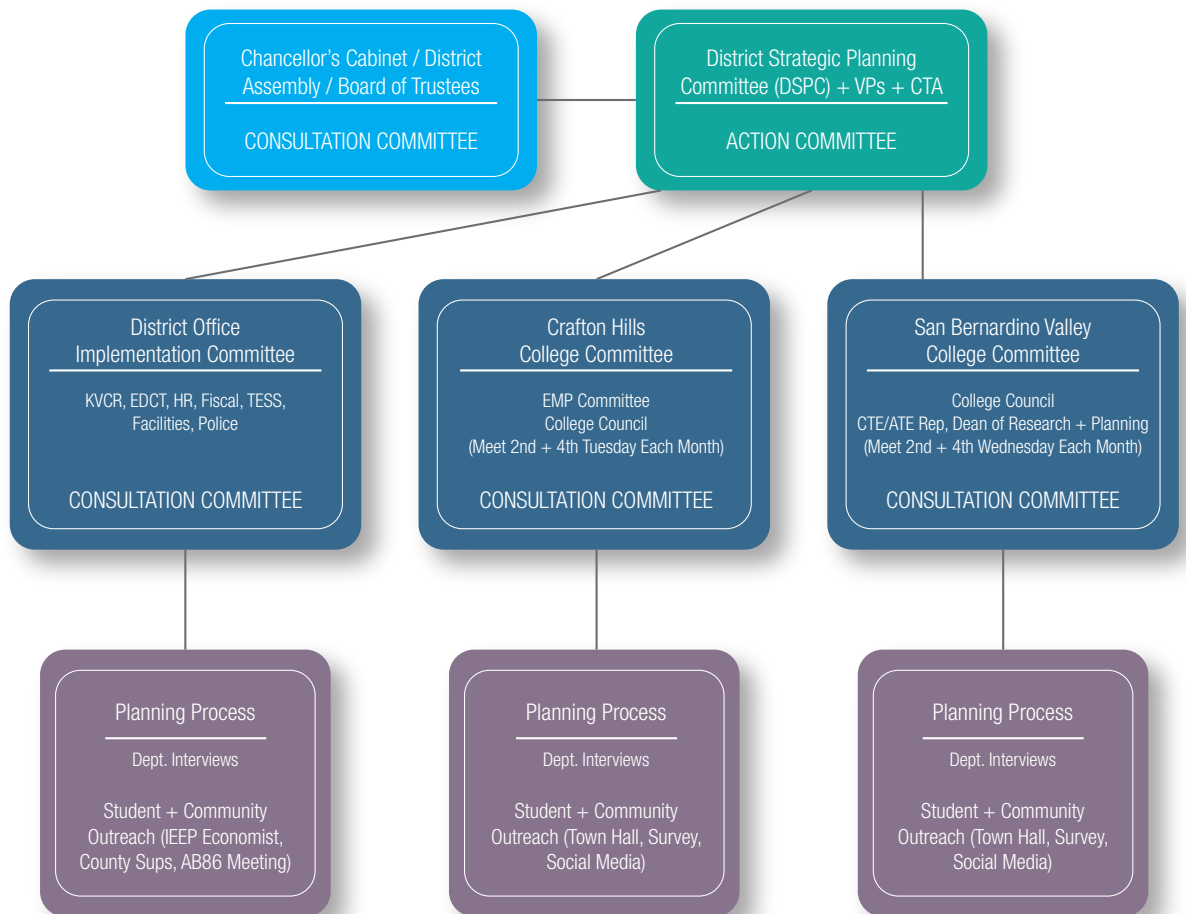

Planning Framework

INTEGRATED PLANNING AND COLLEGIAL CONSULTATION PROCESS

The framework of the District's planning process is guided by an integrated approach. Goals and objectives of the SBCCD *Districtwide Support Services Strategic Plan* must align with a number of larger and smaller plans. Larger plans include the State Chancellor's Office and San Bernardino Community College District Strategic Plans. Smaller College-level plans include the *Educational Master Plan*, *Facilities Master Plan*, *Technology Plan*, *Matriculation Plan*, *Enrollment Management Plan*, *Student Equity Plan*, *Distance Education Plan*, *Grants Plan*, *Budget Plan* and *Marketing/Public Relations Plan*.

The SBCCD Collegial Consultation process is guided by its Board of Trustees policy (Board Policy 2225) to establish procedures to ensure faculty, management, classified staff, and students the right to participate effectively in planning processes. This document is a result of an inclusive collegial shared governance process with input from administration, faculty, staff, students, and the community.

Exhibit 1.01 EMP Collegial Consultation

Planning Framework

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT HISTORY

The San Bernardino Community College District was established by an election held on March 26, 1926. At the time, it was known as the San Bernardino Valley Union Junior College District, and it was the first union district formed in the state. A union district was defined as one made up of two or more contiguous high school districts. The San Bernardino Valley Union Junior College District was formed from the San Bernardino and Colton high school districts, which then joined forces to create the junior college district, elect trustees, establish curriculum and provide facilities and instructors for San Bernardino Valley College.

San Bernardino Valley College (SBVC) was the first college opened by the District and the first class offerings at the current SBVC campus site were in the 1927-28 academic year. The College enrolled nearly 300 students for the fall 1927 semester with fifty-four course offerings.

A bond passed in April 1946 provided for the construction of many new buildings on campus. Increased enrollment and a change in age and interest of post-war students were reflected in changes in the curriculum. Courses in business and technical fields were offered for an increasing percentage of students interested in achieving immediate occupational goals.

Between 1958 and 1966 the College was enlarged to its present size with an addition of seven major buildings and more than doubling of students, faculty, and staff.

By 1975 SBVC enrollment reached approximately 18,000 day and evening students. Changes in curriculum mirrored changing social and economic conditions of the 1960s and '70s. The civil rights movement resulted in a substantial increase in the number of minority students.

The 1980s were filled with a variety of challenges for SBVC. The introduction of state-mandated tuition in 1984 and a cap on state funding resulted in a sharp drop in enrollment. An earthquake in 1992 resulted in seismic survey findings that fifteen buildings on campus were on or located near the San Jacinto earthquake fault. To mitigate seismic issues, major construction projects were started in 2002. Between 2002 and 2009 five new buildings were constructed on the SBVC campus, while six buildings had to be demolished and three buildings retrofitted. Two new classroom building were dedicated in the summer of 2010. The College's construction effort for seismic mitigation and responding to other facilities needs is an ongoing effort.

In 1967, the District office began the development of a new campus in Yucaipa following a special election. Crafton Hills College (CHC) opened in 1971, serving the East Valley. CHC is strategically located in the foothills of the San Bernardino Mountains and overlooks the Yucaipa Valley. The College is sited on 523 acres of land donated by Ruben and Lester Finkelstein and primarily serves communities in eastern San Bernardino County. The College offers more than thirty-eight majors in the liberal arts, sciences, vocational, and technical studies.

When Crafton Hills College opened in 1971, it was comprised of five buildings that housed the library, laboratories, classrooms, student services, and a dining hall, which is still the heart of the campus today. Subsequently, in 2002 and 2008, the citizenry of SBCCD approved two local bond measures that have substantially expanded the campus by adding new buildings/training facilities and improving safety and infrastructure. New facilities on campus include the Learning Resource Center (LRC), Kinesiology, Health and Aquatics Center, Crafton Center, Canyon Hall, and the Public Safety and Allied Health Building.

The “Great Recession” following the economic crisis of 2008 took its toll on District enrollments and operational budgets from 2009-10 to 2012-13 academic years. The passage of Proposition 30 in November 2012 prevented further budget cuts and provides operational funding for the colleges in the District. Since 2013-14, both of the colleges have increased enrollments, full-time equivalent faculty, and course section offerings.

The San Bernardino Community College District most recently conducted a comprehensive Self-Evaluation Report for the Accrediting Commission for Community and Junior Colleges (ACCJC) in October 2014 and submitted Follow-Up Reports in March 2016. As of June 8, 2016 both SBVC and CHC are fully accredited. SBCCD continues to embrace a culture of institutional improvement and refinement. The SBCCD Districtwide Support Services Strategic Plan is a testament to the District’s determination to sustain a culture of accountability and integrated planning.

Currently, the SBCCD oversees San Bernardino Valley College, Crafton Hills College, the Economic Development and Corporate Training division (EDCT) and its own public television and radio station (KVCR TV-FM).

Planning Framework

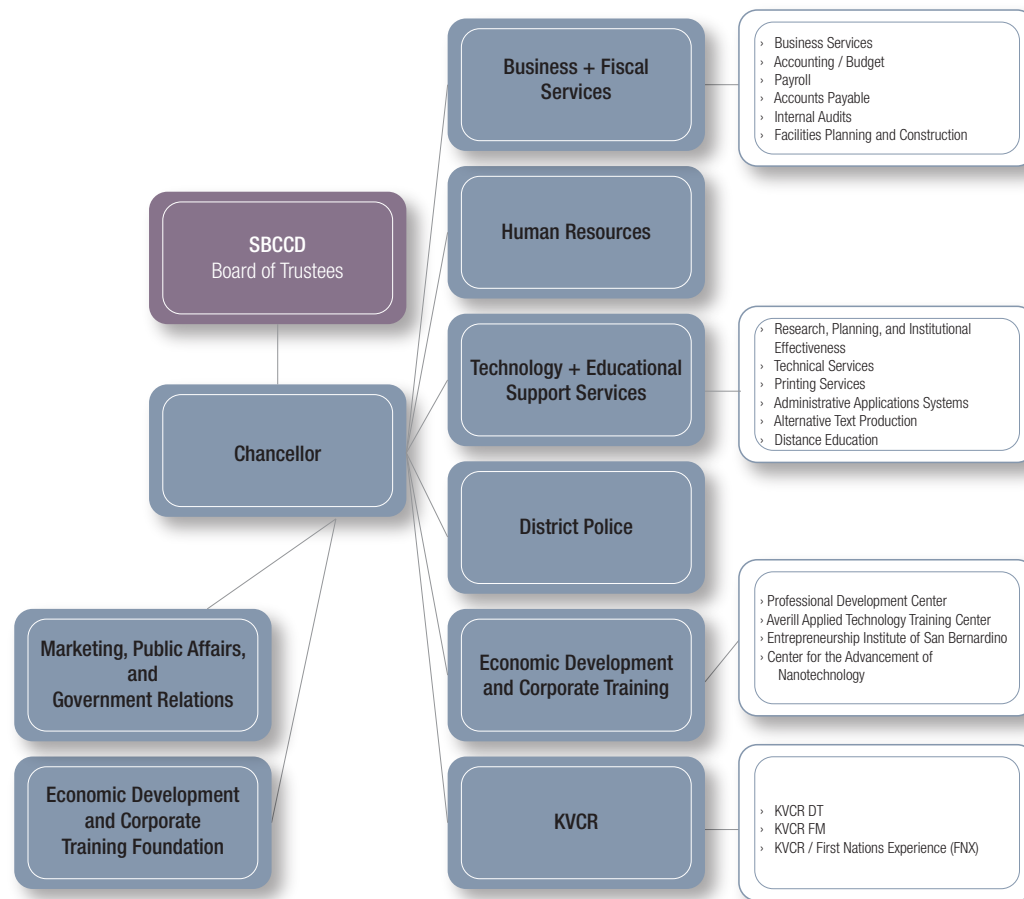

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT ORGANIZATIONAL STRUCTURE

Administrative Services – District Level

The following is a list of administrative services provided by the District Office:

- › Business and Fiscal Services – Responsible for District budgeting, purchasing, contracts, accounting, accounts payable, payroll, student loans, environmental health and safety, and facilities planning and construction.
- › Human Resources – Responsible for providing support services for San Bernardino Valley College, Crafton Hills College, KVCR-FM/TV, the Economic Development and Corporate Training Center and the District Office. Human Resources is also responsible for recruitment of academic, classified, and administrative employees, employee benefits, employee/labor relations, collective bargaining, classification and pay, personnel records maintenance, professional development and training, grievance resolutions, unlawful discrimination complaints, and employee discipline.
- › Technology and Educational Support Services (TESS) – Provides distributed education, administrative applications, information technology, and graphics and printing services to SBVC, CHC, and the District Office.
- › District Police – Provides a safe and secure learning and working environment for all students and employees 24 hours a day, 7 days a week.
- › SBCCD Office of Institutional Effectiveness, Research, and Planning – Collaborates with faculty, staff, administrators, and students to facilitate and support planning and evidence-based decision-making.

MISSION, VISION, AND VALUES

SBCCD Mission (District Strategic Plan)

We transform lives through the education of our students for the benefit of our diverse communities.

The vision statement represents a collective sense of the institutions' direction over the next decade:

SBCCD Vision (District Strategic Plan)

SBCCD will be most known for student success.

- › Our educational programs and services will be highly sought after.
- › Our students will be the most preferred by four-year institutions and employers.
- › Our students will have the highest graduation rates at four-year institutions.
- › Our students will have the highest employment rates in our communities.
- › Our district will be the gateway to pathways and opportunities for a brighter future.

- › Our students and alumni will make a significant contribution to the socioeconomic prosperity of our communities.

- › Our employees will want to be here, love working here, and go above and beyond for student success.

The institutional tenets describe the philosophy and values of faculty, staff, and administration:

SBCCD Values (District Strategic Plan)

Service, Integrity, Collaboration, Innovation, Quality

Planning Environment

Internal District Profile

This internal scan of the San Bernardino Community College District (SBCCD) is an opportunity to assess demographics and other characteristics of the student and employee population based on historical data. The data is utilized to identify and understand patterns and trends within the SBCCD to inform institutional planning decisions. Internal scan data presented in this plan will analyze student and employee data on an overall District level.

The following are key elements of the internal scan, which inform SBCCD challenges and recommendations. Other internal scan elements are included in *Appendix A* of this document.

Planning Environment - Internal District Profile

ENROLLMENT TRENDS

The most recent peak enrollment at SBCCD was during the 2008-09 academic year, when the District enrolled 31,716 students. From 2008-09 to 2012-13 overall District enrollment decreased by 8,646 students (-27.26%). The decline equates to a 7.65% average annual decrease in enrollment over four academic years and occurred during a time when the statewide economy was experiencing the “Great Recession” and California community colleges were in the midst of budget cuts and annual budget uncertainty. More recently, the District has been experiencing an increase in enrollment. From 2012-13 to 2014-15, enrollment increased by 2,605 students (11.29%). The increase is equivalent to a 5.49% average annual increase in enrollment over two academic years. *(Reference: Exhibit 2.01 Historical Enrollment on page 2.4)*

From 2010-11 to 2014-15, students who enrolled in face-to-face courses only at SBCCD accounted for an average of 69.01% of enrollment (17,316 students). During the same years, students who enrolled in online classes only accounted for an average of 2.31% of enrollment (580 students) and students who enrolled in hybrid courses only accounted for an average of 0.97% of enrollment (245 students). Students who took courses using multiple instructional methods

accounted for an average of 27.71% of enrollment (6,932 students).

From 2010-11 to 2014-15, enrollment in face-to-face only courses decreased by 4,597 students (-22.3%) and hybrid-only enrollment decreased by 32 students (-11.39%). During the same time period, students who enrolled in online only classes increased by 423 students (85.8%) and enrollment in courses with multiple instructional methods increased by 1,860 students (28.04%).

The number and proportion of students enrolling in traditional face-to-face instruction only has been declining and shifting to students utilizing multiple instructional methods for their courses. *(Reference: Exhibit 2.02 Enrollment by Instructional Method on page 2.5)*

Weekly Student Contact Hours (WSCH) is calculated by the number of hours courses meet during the semester, times the number of students in those courses. WSCH generation is considered a measure of revenue for the Colleges and the District. From 2010-11 to 2014-15, fall term accounted for an average of 47.39% of total WSCH; spring term accounted for an

average of 46.82% of total WSCH; and summer term accounted for an average of 5.79% of WSCH. During this period overall WSCH in the District decreased by 2.11% (-9,755 WSCH). From 2010-11 to 2014-15, fall term WSCH decreased by 6.79% (-15,155 WSCH) and spring term WSCH decreased by 6.7% (-14,504 WSCH). However, summer term WSCH increased by 91.4% (19,904 WSCH) during that same time period. Since 2012-13, the District’s WSCH generation has increased by 12.37% (49,741 WSCH) over two academic years (2013-14 and 2014-15). *(Reference: Exhibit 2.03 WSCH Generation on page 2.6)*

From 2010-11 to 2014-15, the average annual growth rate of section offerings in the District was 4.25% (equivalent to 182.5 sections added per year). Section offerings reached their most recent low during the 2011-12 academic year (3,527 sections). However, the District generated 117.58 WSCH per section in 2011-12 (the highest in recent years). From 2011-12 to 2014-15, course offerings increased by 1,228 sections (34.82%) while WSCH per sections offered decreased to 94.99 WSCH/section. *(Reference: Exhibit 2.04 Section Offerings on page 2.7)*

From 2010-11 to 2014-15, SBCCD achieved its highest productivity in 2010-11, when the District had 874.89 full time equivalent faculty (FTEF) and produced 527.43 WSCH/FTEF. From 2012-13 to 2014-15, the District increased faculty by 191.76 FTEF (23.99%); however, productivity decreased by 47.12 WSCH/FTEF (-9.37%). The California Community College recommended standard for productivity is 525 WSCH/FTEF, which represents the approximate point of financial breakeven for a College/District. (*Reference: Exhibit 2.05 Productivity—WSCH/FTEF on page 2.8*)

STUDENT SUCCESS AND COMPLETION

From 2010-11 to 2014-15, SBCCD experienced an average retention rate of 87.9% and an average success rate of 69.75%. The most recent peak retention rate at SBCCD was 89.49% in 2012-13, while the most recent peak success rate was 71.25% in 2011-12. From 2012-13 to 2014-15, SBCCD's retention rate declined at an average annual rate of 0.63% while the success rate declined at an average annual rate of 1.7%. From 2010-11 to 2014-15, the average gap between success and retention rates was 18.15%.

In fall 2014, statewide averages for success and retention rates were 69.01% and 86.3%, respectively. *(Reference: Exhibit 2.06 Success and Retention Rates on page 2.11)*

The total number of degrees and certificates awarded at SBCCD increased by 33.42% (802 awards) from 2010-11 to 2014-15. During the same time period, the number of AS/AA degrees awarded increased by 35.56% (340 degrees), while certificates requiring 60+ semester units decreased by 59.18% (-29 certificates). From the time AA-T/AS-T degrees were implemented in 2012-13, the number of associate degrees for transfer increased by 218 (250.57%) in just two academic years (2012-13 to 2014-15). In 2014-15, associate for

transfer degrees accounted for 19.05% of all associate degrees awarded (305 AA-T/AS-T awards of 1,601 total AA/AS awards). *(Reference: Exhibit 2.07 Degrees and Certificates Awarded on pages 2.12 and 2.13)*

Completion rate or Student Progress and Attainment Rate (SPAR) may be defined as the percentage of first-time students with a minimum of 6 units earned who attempted any math or English in the first three years and achieved any of the following outcomes within six years of entry:

- › Earned an AA/AS or Cedit Certificate (Chancellor's Office approved)
- › Transfer to a four-year institution
- › Achieved "transfer prepared" status (successful completion of 60 UC/CSU transferrable units with a GPA ≥ 2.0)

From 2005-06 to 2009-10, the average completion rate for SBCCD student cohorts was 37.2%, while the statewide average completion rate was 48.1%. During the same time period, the average gap between SBCCD's completion rate and the statewide average

completion rate was 10.8%. *(Reference: Exhibit 2.08 Completion / Student Progress & Attainment Rate (SPAR) on page 2.14)*

SBCCD transfer volume most recently peaked in 2011-12, with 1,232 total transfers. From 2009-10 to 2013-14, the average proportion of California State University (CSU) transfers was 44.28%; the average proportion of in-state private school transfers was 28.23%; the average proportion of out-of-state transfers was 20.90%; and the average proportion of University of California (UC) transfers was 6.6%. During the same time period, total transfer volume within the SBCCD increased by 147 students (14.34%). *(Reference: Exhibit 2.9 Transfer Volume on page 2.15)*

Planning Environment - Internal District Profile

EMPLOYEE DEMOGRAPHICS

From fall 2010 to fall 2014, the average proportion of adjunct faculty within the SBCCD was 43.03%; classified/confidential employees accounted for an average of 31.67% of all employees; the average proportion of full-time faculty was 18.76%; and managers accounted for an average of 6.54% of all employees. Full-time faculty decreased by 3.15% (-7 employees) over the same five fall terms, while adjunct faculty increased by 16.47% (83 employees). Classified/confidential employees decreased by 15.97% (-65 employees) and managers increased by 59.62% (31 employees). From fall 2010 to fall 2014, the total number of employees within SBCCD increased by 3.54% (42 employees). In Fall 2014, 26.81% of SBCCD's faculty were full-time employees (215 full-time faculty of 802 total faculty). *(Reference: Exhibit 2.10 Unduplicated Employees by Type on page 2.17)*

From fall 2010 to fall 2014, employees age 55 or older increased by 18.45% (69 employees), while employees 18-34 years old decreased by 3.03% (-6 employees). During the same time, employees age 35-44 years old increased by 10.61% (28 employees), while employees age 45-54 years old decreased by 14.04% (-49 employees). In fall 2014, 352 employees were within the 50-59 age group (28.69%) and 247 employees

were age 60 or older (20.13%). Employee data by age group suggests that it may be reasonable to expect approximately 49% of the District's employees to retire within the next 15 years. *(Reference: Exhibit 2.11 Unduplicated Employees by Age (Start of Fall Term) on page 2.18)*

From fall 2010 to fall 2014, the number of Caucasian employees at SBCCD decreased by 0.61% (-4 employees), the number of Hispanic employees increased by 9.34% (24 employees), and the number of Asian employees increased by 29.17% (28 employees). During the same time period, Caucasians accounted for an average of 54.9% of employees, Hispanics accounted for an average of 22.4% of employees, and Asians accounted for an average of 9% of employees. *(Reference: Exhibit 2.12 Unduplicated Employees by Race/Ethnicity (Fall Term) on page 2.19)*

From fall 2010 to fall 2014, females accounted for an average of 53.6% of SBCCD employees, while males accounted for an average of 46.4% of employees. During the same time, female employees increased by 4.78% (30 persons) while males increased by 2.15% (12 persons). *(Reference: Exhibit 2.13 Unduplicated Employees by Gender (Fall Term) on page 2.20)*

Planning Environment - Internal District Profile

INTERNAL SCAN FINDINGS

Analysis of data regarding the internal District profile at the SBCCD provides insight for making informed planning decisions. The following findings are derived from the internal scan data in this chapter and *Appendix A* of the Districtwide Support Services Strategic Plan:

Student Demographics

- › The 20-24 year old age group is the largest age group within the District (9,602 students in 2014-15) and the only student age group to increase in enrollment from 2010-11 to 2014-15 (257 students). The student age group that experienced the most decline during the same period were those 19 and younger (-783 students).
- › Hispanic students accounted for 57.15% of District enrollment in 2014-15 (14,672 students). From 2010-11 to 2014-15, the number of Caucasian students decreased by 2,310 students (-28.84%), while the number of Hispanic students increased by 1,496 students (11.35%).

- › Female students accounted for 55.29% of District enrollment in 2014-15 (14,195 students). From 2010-11 to 2014-15, the number of female students decreased by 1,133 students (-7.39%), while the number of male students declined by 1,222 students (-9.66%).

Enrollment Trends

- › From 2008-09 to 2012-13, overall District enrollment decreased by 8,646 students (-27.26%). However, from 2012-13 to 2014-15, enrollment within the SBCCD increased by 2,605 students (11.29%). In 2014-15, the District was still 6,041 students shy of its most recent peak enrollment (31,176 students in 2008-09 compared to 25,675 students in 2014-15).
- › The number and proportion of students enrolling in traditional face-to-face instruction only has been declining and shifting to students utilizing multiple instructional methods. In 2010-11, 73.57% of students within the District enrolled in only traditional face-to-face courses (20,614 students). By 2014-15, 62.38% of students within the District enrolled in only traditional face-to-face courses (16,017 students). During the same time, online only course enrollment increased by 423 students (85.8%) and enrollment in courses utilizing multiple instructional methods increased by 1,860 students (28.04%).
- › Although California residents account for over 95% of students, California resident students declined by 2,812 students (-10.3%) from 2010-11 to 2014-15. During the same time, California non-residents increased by 484 students (149.38%) and foreign country residents increased by 81 students (30.57%).
- › Continuing students account for the majority of enrollment within the District (17,087 students or 66.55% of enrollment in 2014-15). First-time college students only accounted for 7.58% of enrollment in 2014-15 (1,945 students), a decrease of 823 students from 2012-13 to 2014-15. During the same time, under age 18 or K-12 special admit students increased by 95 students (7.16%).
- › From 2010-11 to 2014-15:
 - › Total WSCH generation decreased by 9,755 WSCH (-2.11%)

- › Enrollment decreased by 2,346 students (-8.37%)
- › Total section offerings increased by 730 sections (18.14%)
- › Total FTEF increased by 116.14 FTEF (13.27%)
- › Total productivity decreased by 71.65 WSCH/FTEF (-13.59%)
- › In 2011-12, the District generated 117.58 WSCH per section. However, in 2014-15, the District generated 94.99 WSCH per section.
- › In 2010-11, the District had 874.89 FTEF that reached a productivity level of 527.43 WSCH/FTEF. However, in 2014-15 the District had 991.03 FTEF that reached a productivity level of 455.78 WSCH/FTEF.
- › The majority of students within the District stated an educational goal of obtaining a BA/BS upon transfer to a four-year institution (16,367 students or 63.75% of unduplicated enrollment

in 2014-15). From 2010-11 to 2014-15, the proportion of students with the goal of obtaining a BA/BS upon transfer increased by 11.56% (1,743 students).

Student Success and Completion

- › From 2010-11 to 2014-15, SBCCD experienced an average retention rate of 87.9% and an average success rate of 69.75%. In 2014-15, the District's retention rate was 88.37% (statewide retention rate for fall 2014 was 86.3%). In 2014-15, the District's success rate was 68.45% (statewide success rate for fall 2014 was 69.01%).
- › From 2010-11 to 2014-15, total degrees and certificates awarded increased by 802 awards (33.42%). The most significant numerical growth was experienced in AA/AS degrees, which increased by 340 awards (35.56%) during the same time period. The most significant percentage growth was experienced in AS-T/AA-T degrees, which increased by 250.57% (218 awards) in two years (2012-13 to 2014-15).
- › Student cohorts from 2005-06 to 2009-10 had an average completion rate/SPAR of 37.2%

within 6 years of entry, while the statewide average completion rate/SPAR was 48.1%.

- › From 2009-10 to 2013-14, the average transfer volume within the District was 1,112 students. During the same period, the average proportion of CSU transfers was 44.28%, while the average proportion of in-state private school transfers was 28.23%, approximately 20.9% of transfers went to out-of-state schools, and 6.6% of transfer students enrolled in UC schools.

Employee Demographics

- › In fall 2014, adjunct faculty accounted for 47.84% of all employees (587 persons), while full-time faculty accounted for 17.52% of all employees (215 persons). Approximately 26.81% of the District's entire faculty were full-time employees (215 full-time faculty of 802 total faculty).
- › In fall 2014, 352 employees were within the 50-59 age group (28.69% of all employees) and 247 employees were age 60 or older (20.13% of all employees). Data suggests that it is reasonable to expect nearly half (49%) of the District's employees to retire within the next 15 years.

Planning Environment - Internal District Profile

INTERNAL SCAN FINDINGS *(cont.)*

- › In fall 2014, 53.5% of the District's employees were Caucasian (657 persons), 22.9% of employees were Hispanic (281 persons), 11.1% of employees were African American (136 persons) and 10.1% of employees were Asian (124 persons). From fall 2010 to fall 2014, Caucasian employees decreased by 4 persons (-0.61%) and African American employees decreased by 6 persons (-4.23%). Hispanic employees increased by 24 persons (9.34%) and Asian employees increased by 28 employees (29.17%) during the same time.
- › In fall 2014, 53.6% of the District's employees were female (658 persons), while 46.4% of employees were male (569 persons). From fall 2010 to fall 2014, the number of male employees increased by 12 persons (2.15%) while females increased by 30 persons (4.78%).

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT

Crafton Hills College | San Bernardino Valley College | Economic Development & Corporate Training | KVCR TV-FM

Planning Environment

External District Profile

The intent of the external scan of the San Bernardino Community College District (SBCCD) is to assess demographics and other characteristics of the regional community that the District services. The external scan is used to identify and understand patterns and trends within the area and informs planning directions. The analysis presented in this Plan is based on service area (ZIP codes) and region (Riverside and San Bernardino Counties). Economic Modeling Specialists International (EMSI), Census 2010 American Community Survey 5-Year Estimates (2010-2014), and California Department of Education data was utilized to analyze the community the District serves.

Planning Environment - External District Profile

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT SERVICE AREA AND REGIONAL AREA

The San Bernardino Community College District service area includes 22 cities/areas:

- › Rancho Cucamonga
- › Banning
- › Beaumont
- › Grand Terrace
- › Big Bear
- › Bloomington
- › Calimesa
- › Colton
- › Crestline
- › Fontana
- › Highland
- › Lake Arrowhead
- › Loma Linda
- › Lytle Creek
- › Mentone
- › Redlands
- › Rialto
- › Running Springs
- › Yucaipa
- › San Bernardino
- › Riverside
- › Moreno Valley

Regionally, SBCCD serves the counties of San Bernardino and Riverside.

Planning Environment - External District Profile

POPULATION ESTIMATES AND PROJECTIONS

Population data provides an opportunity to understand the makeup of the population the District primarily serves, relative to the region and state. From 2005 to 2015, the service area population grew by 14.58% (186,271 persons) while the region's total population grew by 17.28% (669,696 persons). By comparison, the state's population grew by 9.11% (3,262,423 persons).

The projected population growth of the service area and region is expected to diminish over the next 10 years. From 2015 to 2025, the service area total population is projected to grow by 5.37% (78,645 persons) and the region's total population is projected to grow by 7.01% (318,658 persons). Both of these increases exceed the state's projected growth during the same time period, which is expected to grow by 5.08% (1,987,346 persons).

Exhibit 3.01 Total Population Estimates & Projections

Area	2005	2010	2011	2012	2013	2014	2015	2020	2025
Service Area	1,277,259	1,372,810	1,391,891	1,406,266	1,425,438	1,444,476	1,463,530	1,524,723	1,542,175
Regional	3,875,627	4,243,556	4,302,146	4,350,609	4,416,590	4,481,004	4,545,323	4,755,883	4,797,639
California	35,827,805	37,335,221	37,687,015	38,047,900	38,395,867	38,757,231	39,090,228	40,251,903	41,077,574

Source: EMSI

In 2015, the proportion of the service area population age 19 and under was 31.07% (454,658 persons). This is more than the regional proportion of 29.77% (1,353,226 persons) and the statewide proportion of 26.22% (10,248,399 persons) during the same year.

Between 2015 and 2025, population projections suggest that the number of those in the 19 and under age group will increase by 1.64% within the service area (470 persons) and 1.45% in the region (19,651 persons), which is less than the projected 2.07% increase projected for the number of the statewide population in the same age group (212,632 persons).

The 20-24 age group may be considered SBCCD's core age demographic. The 20-24 age group accounted for 8.78% of the service area population in 2015 (128,471 persons). The proportion of the service area population in the 20-24 age group was slightly greater than the regional proportion of 8.28% (376,421 persons) and the state proportion of 8% (3,122,810 persons).

Between 2015 and 2025, population projections suggest that the number of those in the 20-24 age group will decrease by 19.9% in the service area population (-25,561 persons) and 20.23% in the

regional population (-76,153 persons). These are larger decreases than the projected 16.75% decrease in the proportion of the statewide population in the same age group (522,916 persons).

From 2015 to 2025, population projections indicate that the number of those in the 50 and over age group will increase by 16.69% within the service area (64,728 persons) and by 6.55% in the region (216,825 persons). The projected increase for the number of the statewide population in the same age group is 15.8% (1,884,696 persons).

Planning Environment - External District Profile

POPULATION ESTIMATES AND PROJECTIONS *(cont.)*

Exhibit 3.02 Service Area Population by Age Group

Exhibit 3.03 Regional Area Population by Age Group

Planning Environment - External District Profile

POPULATION ESTIMATES AND PROJECTIONS *(cont.)*

The service area is estimated to have seen an increase in the number of Hispanics between 2010 and 2015 by approximately 11.86% (88,837 persons). Between 2015 and 2025, the number of Hispanics in the service area is projected to increase by approximately 9.5% (79,627 persons) and by 10.65% in the region (242,390 persons), both of which are larger than the projected increase in the statewide population of 7.72% (1,186,030 persons). By 2025, the proportion of Hispanics in the service area is projected to reach 59.5% of the total population (917,583 persons) and 52.51% of the total regional population (2,519,083 persons). Hispanics are projected to make-up 40.3% of the state population by the year 2025 (16,555,395 persons).

Between 2010 and 2015 the service area is estimated to have seen a decrease of Caucasians by approximately 4.29% (-16,803 persons). Caucasians in the regional population are estimated to have decreased by approximately 2.23% in the same time period (-34,730 persons). Caucasians in the statewide population are estimated to have decreased by 1.5% between 2010 and 2015 (-231,334 persons).

Between 2015 and 2025, the number of Caucasians in the service area is projected to decrease by 5.06% (-18,981 persons) and by 3.77% in the region (-57,336 persons). The number of Caucasians in the state is projected to decrease by 0.77% in the same time period (-113,913 persons).

In 2015, the proportion of Caucasians in the service area was approximately 25.62% of the service area population (374,997 persons). That same year, the proportion of Caucasians was approximately 33.46% of the regional population (1,521,020 persons) and 37.82% of the statewide population (14,784,442 persons). By 2025, the proportion of Caucasians is projected to be approximately 23.09% of the service area population (356,016 persons), 30.51% of the regional population (1,463,684 persons), and 35.71% of the statewide population (14,670,529 persons).

Between 2010 and 2015 the service area is estimated to have seen an increase of African Americans by approximately 3.88% (5,035 persons). During the same time period, African Americans in the region increased by 5.42% (16,537 persons) and 0.98% in the state

(21,397 persons). Between 2015 and 2025, the number of African Americans in the service area population is projected to increase by 2.36% (3,180 persons). During the same time period, the African American population is projected to increase by 3.69% in the region (11,881 persons) and by 2.22% in the state (48,994 persons).

Exhibit 3.04 Service Area Population by Race/Ethnicity

Planning Environment - External District Profile

POPULATION ESTIMATES AND PROJECTIONS *(cont.)*

In 2015, the proportion of African Americans within the service area population was 9.2% (134,716 persons). That same year, the proportion of African Americans was 7.08% of the regional population (321,815 persons) and 5.65% of the state population (2,210,310 persons). By 2025 the proportion of African Americans is projected to make up 8.94% of the service area population (137,896 persons) and 6.96% of the regional population (333,696 persons), as compared to the projected 5.5% of the state population (2,259,304 persons).

(292,858 persons) and 13.75% of the state population (5,373,673 persons). By 2025, the proportion of Asians in the service area population is projected to be 6.21% (95,784 persons) and 6.99% in the region (335,560 persons), as compared to 14.85% of the state's population (6,101,547 persons).

Between 2010 and 2015, the service area is estimated to have seen an increase of Asians by approximately 14.12% (10,397 persons). During the same time period, the number of Asians increased by 14.9% in the region (37,972 persons) and by 10.87% in the state (526,681 persons). Between 2015 and 2025, the number of Asians in the service area population is projected to increase by approximately 13.96% (11,736 persons). During the same time period, the number of Asians is projected to increase by approximately 14.58% in the region (42,702 persons) and by approximately 13.55% in the state (727,874 persons). In 2015, the proportion of Asians in the service area population was 5.74% (84,048 persons). That same year, the proportion of Asians was 6.44% of the regional population

Exhibit 3.05 Regional Area Population by Race/Ethnicity

Planning Environment - External District Profile

POPULATION ESTIMATES AND PROJECTIONS *(cont.)*

Between 2010 and 2015, the service area male population proportion has stayed relatively steady at approximately 49.3% of the population. In the same time period, the regional male population proportion increased marginally by 0.4%. The state's male population proportion increased by an even smaller amount of 0.01% during the same time period.

Between 2010 and 2015, the service area female population proportion has stayed relatively steady at approximately 50.7% of the population. In the same time period, the regional female population proportion decreased marginally by 0.4%. The state's female population proportion decreased by an even smaller amount of 0.01% during the same time period.

Between 2015 and 2025, the proportion of males and females in the service area, regional, and state populations are projected to remain relatively steady. During the same time period, the number of males within the service area is projected to increase by approximately 5.24% (37,859 persons) and the number of females is projected to increase by approximately 5.5% (40,785 persons). The number of males in the region is projected to increase by approximately 5.39% (121,906 persons) and the number of females in the

region is projected to increase by approximately 5.71% (130,409 persons) during the same time period. The number of males and females during the same time period in the statewide population is projected to increase by 4.79% and 5.37% respectively (931,711 and 1,055,635 persons).

Planning Environment - External District Profile

EDUCATIONAL ATTAINMENT

District service area, regional, and state data regarding educational attainment provide insight into the academic achievement background of the population and the relationship between income and education levels.

The proportion of service area residents age 25 and over with no high school diploma is estimated to be 24.91% (209,569 persons), which is higher than the regional proportion of 21.83% (581,696 persons). Both the service area and regional proportion of population with no high school diploma exceeds the statewide proportion of 19.28%.

The proportion of service area residents age 25 and over with at most a high school diploma or equivalent is estimated to be 25.73% of the population (216,439 persons), which is fractionally less than the regional proportion of 25.89% (689,898 persons). The proportion of population with at most a high school diploma or equivalent in the service area and region exceeds the state's proportion of 20.91%.

Slightly more than half of the population in the service area (50.64%) and slightly less than half of the regional population (47.72%) age 25 and over are estimated

to not have any higher education experience. The statewide average population, age 25 and over, with any higher education experience is 40.18%.

The largest educational discrepancy between service area and regional residents age 25 and over with college experience when compared to state levels of educational attainment is for those with a Bachelor's degree. The proportion of the service area population with a BA/BS degree is 11.13%, which is approximately 1.73 times less than that of the State's 19.2%. The proportion of the regional population with a BA/BS degree (12.51%) is slightly higher than the service area proportion. Approximately 10.9% of the state population has a Graduate or Professional degree, while the service area proportion is 6.48% (6.68% regionally).

The average median income of the population age 25 and over in the service area (\$34,909) and region (\$33,851) is slightly less than the state median of \$37,170.

For service area residents age 25 and over, the average median income of those with at least some college experience or an AA/AS degree increases by \$6,451 when compared to the income of those with only a high

school diploma or equivalent. Moreover, the average median income for service area residents with a BA/BS degree increases by \$12,604 when compared to those with only some college experience or an AA/AS degree, and increases by \$19,055 when compared to those with only a high school diploma or equivalent.

Service area and regional residents with a high school diploma/equivalent or less have a median income that is greater than the statewide median. Conversely, service area and regional residents with a BA/BS degree or higher have an average median income that is less than the statewide median. This dynamic may be correlated to the makeup and availability of blue collar jobs in the area.

HOUSEHOLD SIZE, INCOME, AND POVERTY

The service area average household size (3.03 persons) is slightly higher than that of the region (2.92 persons). Both the service area and regional average household size are greater than the state's average of 2.76 persons. Median household income within the service area is \$770.31 more than in the region (\$55,346) and is \$5,372.69 less than the state median (\$61,489). Average per capita income in the service area is \$510.74 less than in the region (\$22,522) and is \$7,894.74 less than the statewide per capita income (\$29,906).

The poverty rate of families within the service area (16.01%) is 1.13 times greater than within the region (14.14%). However, both the service area and regional poverty rate of families are greater than the state's rate of 12.3%.

Exhibit 3.10 Household Size, Income & Poverty

Area	Avg. Household Size	Median Household Income	Per Capita Income	Families Below Poverty (%)
Service Area	3.03	\$56,116.31	\$ 22,011.26	16.0%
Region	2.92	\$55,346.00	\$ 22,522.00	14.1%
California	2.76	\$61,489.00	\$ 29,906.00	12.3%

FEEDER HIGH SCHOOL STUDENT PROFICIENCY

Student proficiency is measured with the California Assessment of Student Performance and Progress (CAASPP) test administered to students in the 11th grade. In the 2014-15 academic year, Redlands Senior High produced the greatest percentage of proficient students out of the top ten feeder high schools to the District, with 77% having met or exceeded the CAASPP standards for English and 45% having met or exceeded the CAASPP standards for math. Citrus Valley produced the second largest percentage of proficient students, with 69% having met or exceeded the standards for English and 37% having met or exceeded the standards for math. The least proficient feeder high school in English was Pacific High, where 34% of students met or exceeded the standards for English. The least proficient feeder high school in math was Colton High, where 14% of students met or exceeded the standards for math.

In the 2014-15 academic year, the average percentage of students from the top 10 feeder high schools who either met or exceeded the CAASPP standards for English was 52%, which is 8% higher than the state average of 44%. The average percentage of top 10 feeder high school students who either met or exceeded the CAASPP standards for math was 25%, which is 8% lower than the state average of 33%.

Exhibit 3.11 Top Ten Feeder High School CAASPP Test Results (Administered in 11th Grade)

School	Percent of Students Who Met or Exceeded Standards	
	English	Math
Yucaipa	52%	24%
Other / Home	N/A	N/A
Colton	35%	14%
Redlands East	64%	33%
Citrus Valley	69%	37%

Planning Environment - External District Profile

NEIGHBORING HIGHER EDUCATIONAL INSTITUTIONS FROM SBVC

Recognizing other higher educational institutions located within a reasonable distance of the SBCCD service area is an important factor in understanding educational options available to service area residents. For those with vehicular transportation means, an approximate one hour drive-time is considered a reasonable distance for service area residents to travel for higher education needs.

Approximately 52 higher education institutions are within approximately one driving hour away from SBVC. Of those institutions, 23 are California Community Colleges (excluding Crafon Hills College). There is also one private junior college within one driving hour from SBVC, 21 private 4-year colleges, five California State Universities (Cal Poly Pomona, CSU San Bernardino, CSU Fullerton, CSU Los Angeles and CSU Long Beach), and two University of California colleges (UC Riverside and UC Irvine).

NEIGHBORING HIGHER EDUCATIONAL INSTITUTIONS FROM CHC

There are approximately 48 higher education institutions that are one driving hour away from CHC. 21 of those neighboring institutions are California Community Colleges (excluding San Bernardino Valley College). There are also two vocational colleges and one private vocational college. Another is a private junior college. 17 of the neighboring institutions are private 4-year colleges. Among the neighboring institutions are four California State Universities (Cal Poly Pomona, CSU San Bernardino, CSU Fullerton and CSU Los Angeles). Two belong to the University of California system (UC Riverside and UC Irvine).

Planning Environment - External District Profile

EXTERNAL SCAN FINDINGS

Analysis of data regarding the external scan provides insight for making informed planning decisions. The following findings are derived from the external scan data presented in this chapter of the EMP:

Population Demographics

- › From 2005 to 2015:
 - › Service area total population is estimated to have grown by 14.58% (186,271 persons)
 - › Regional area total population is estimated to have grown by 17.28% (669,696 persons)
 - › State total population is estimated to have grown by 9.11% (1,755,007 persons)
- › From 2015 to 2025:
 - › Service area total population is projected to grow by 5.37% (78,645 persons)
 - › Regional area total population is projected to grow by 7.01% (318,658 persons)
 - › State total population is projected to grow by 5.08% (1,987,346 persons)
- › Population projections suggest that between 2015 and 2025, the number of people in the 19 and under age group will increase by 1.64% within the service area (7,470 persons) and 1.45% in the region (19,651 persons), which is less than the projected 2.07% increase projected for the number of the statewide population in the same age group (212,632 persons).
- › Between 2015 and 2025, population projections indicate that the number of people in the 20-24 age group will decrease by 19.9% in the service area population (-25,561 persons) and 2.23% in the regional population (-76,153 persons), both of which are larger decreases than the projected 16.75% decrease in the number of the statewide population in the same age group (-522,916 persons).
- › Population projections suggest that the number of people in the 50 and over age group will increase by 16.69% in the service area (64,728 persons) and by 16.55% in the region (216,825 persons). The projected increase for that same age group in the state is 15.38% (1,884,696 persons).
- › By 2025, Hispanics are expected to make-up:
 - › 59.5% of the service area population
 - › 52.51% of the regional population
 - › 40.3% of the state population
- › By 2025, Caucasians are expected to account for:
 - › 23.09% of the service area population
 - › 30.51% of the regional population
 - › 37.71% of the state population
- › By 2025, African Americans are expected to constitute:
 - › 8.94% of the service area population
 - › 6.96% of the regional population
 - › 5.5% of the state population
- › By 2025, Asians are expected to comprise:
 - › 6.21% of the service area population
 - › 6.99% of the regional population
 - › 14.85% of the state population
- › Between 2015 and 2025, the service area male population is projected to increase by 5.24% (37,859 persons) and the female population is projected to increase by 5.5% (40,785 persons).

The number of males within the regional population is projected to increase by 5.39% (121,906 persons) and 5.71% for females (130,409 persons). The number of males within the statewide population is projected to increase by 4.79% (931,711 persons) and 5.37% for females (1,055,635 persons) during the same time period.

Educational Attainment

- › The proportion of service area residents age 25 and over with no high school diploma is estimated to be 24.91% (209,569 persons), which is higher than the regional proportion of 21.83% (581,696 persons). Both the service area and regional proportion of population with no high school diploma is higher than the statewide proportion of 19.28%.
- › 50.64% of the service area residents age 25 and over do not have any higher education experience (426,008 persons) while 47.72% of regional residents age 25 and over do not have any higher education experience (1,271,594 persons). The statewide average of persons age 25 and over without any higher education

experience is 40.18% (9,954,719 persons).

- › The proportion of service area residents age 25 and over with a BA/BS degree is 11.13%, which is approximately 1.73 times less than that of the state's 19.23%. The proportion of the regional population age 25 and over with a BA/BS degree is 12.51%.
- › The average median income of the population age 25 and over in the service area (\$34,909) and region (\$33,851) is slightly less than the state median of \$37,170.
- › Service area and regional residents age 25 and over with a high school diploma/equivalent or less have a median income that is greater than the statewide median. Conversely, service area and regional residents with a BA/BS degree or higher have a median income that is less than the statewide average. This dynamic may be correlated to the makeup and availability of blue collar jobs in the area.

Household Size, Income & Poverty

- › The average household size in the service area

is 3.03 persons and 2.92 in the region, both of which are higher than the state's average of 2.76 persons.

- › Average median household income in the service area is \$56,116, as compared to \$55,346 in the region and \$61,489 in the state.
- › Per capita income in the service area is \$22,011.26 and \$22,522 in the region, while per capita income in the state is \$29,906.
- › The percentage of families below the poverty line in the service area is 16%. The percentage of families below the poverty line in the region is 14.1% and 12.3% in the state.

Service Area High Schools

- › In the 2014-15 academic year, Redlands Senior High produced the greatest percentage of proficient students out of the top ten feeder high schools to the District, with 77% having met or exceeded the CAASPP standards for English and 45% having met or exceeded the CAASPP standards for math. Citrus Valley produced the second largest percentage of proficient students,

Planning Environment - External District Profile

EXTERNAL SCAN FINDINGS *(cont.)*

with 69% having met or exceeded the standards for English and 37% having met or exceeded the standards for math. The least proficient feeder high school in English was Pacific High, where 34% of students met or exceeded the standards for English. The least proficient feeder high school in math was Colton High, where 14% of students met or exceeded the standards for math.

- › In the 2014-15 academic year, the average percentage of students from the top 10 feeder high schools who either met or exceeded the CAASPP standards for English was 52%, which is 8% higher than the state average of 44%.
- › In the 2014-15 academic year, the average percentage of students from the top 10 feeder high schools who either met or exceeded the CAASPP standards for Math was 25%, which is 8% lower than the state average of 33%.

Neighboring Higher Education Institutions

- › There are approximately 52 higher education institutions that are approximately one driving hour away from SBVC. Those 52 neighboring

institutions are comprised of:

- › 23 California Community Colleges
 - › One private junior college
 - › 21 private 4-year colleges
 - › Five California State Universities (Cal Poly Pomona, CSU San Bernardino, CSU Fullerton, CSU Los Angeles and CSU Long Beach)
 - › Two University of California Institutions (UC Riverside and UC Irvine)
-
- › There are approximately 48 higher education institutions that are 1 driving hour away from CHC. Those 48 neighboring institutions are comprised of:
 - › 21 California Community Colleges
 - › Two vocational colleges
 - › One private vocational college
 - › One private junior college
 - › 17 private 4-year colleges
 - › Four California State Universities (Cal Poly Pomona, CSU San Bernardino, CSU Fullerton and CSU Los Angeles)
 - › Two University of California institutions (UC Riverside and UC Irvine)

District Labor Market Information

The San Bernardino Community College District (SBCCD) is committed to providing students with education for transfer to four-year institutions and with career technical and professional education important to the region. In an effort to best understand economic conditions, the following chapter examines labor market information for the region (San Bernardino and Riverside Counties) as well as the service area community directly in the District's sphere of influence.

Planning Environment - District Labor Market Information

LABOR FORCE, EMPLOYMENT, AND UNEMPLOYMENT

Labor force may be defined as the working age population (16 years and older) that is employed (part or full time) or actively seeking employment. The SBCCD service area labor force is comprised of approximately 746,200 residents age 16 and over. Approximately 1,961,800 of the regional population age 16 and over made up the labor force.

In 2015, the unemployment rate of the service area (6.38%) and the region (6.6%) was fractionally higher than the state’s estimated unemployment rate of 6.2%.

Exhibit 4.01 Labor Force, Employment & Unemployment (Annual Average 2015)

Area	Labor Force	Employment	Unemployment	Unemployment Rate
Service Area	746,200	698,900	47,600	6.38%
Region	1,961,800	1,832,300	129,500	6.60%
State	18,981,800	17,798,600	1,183,200	6.20%

INDUSTRY ESTIMATES AND PROJECTIONS

In 2015, the top five employment industries for the service area were the following: Healthcare and Social Assistance (17.55% or 67,427 jobs), Government (13.63% or 52,344 jobs), Retail Trade (12.42% or 47,720 jobs), Accommodation and Food Services (8.85% or 34,006 jobs), and Transportation and Warehousing (8.34% or 32,044 jobs).

the following: Healthcare and Social Assistance (20,244 jobs or 30.02%), Transportation and Warehousing (10,608 jobs or 33.1%), Retail Trade (7,736 jobs or 16.21%), Accommodation and Food Services (7,412 jobs or 21.8%), and Wholesale Trade (4,296 jobs or 26.79%).

Between 2010 and 2015, the top five employment industries in the service area grew by the following: Healthcare and Social Assistance (53% or 23,435 jobs), Government (2% or 966 jobs), Retail Trade (9% or 3,961 jobs), Accommodation and Food Services (22% or 6,106 jobs), and Transportation and Warehousing (44% or 9,853 jobs).

By 2025, the top five employment industries in the service area are projected to be: Healthcare and Social Assistance (19.48% or 87,671 jobs), Government (12.43% or 55,969 jobs), Retail Trade (12.32% or 55,456 jobs), Transportation and Warehousing (9.48% or 42,652 jobs), and Accommodation and Food Services (9.2% or 41,418 jobs).

From 2015 to 2025, the largest numerical job growth for service area employment by industry is expected to be

INDUSTRY ESTIMATES AND PROJECTIONS *(cont.)*

In 2015, the top five employment industries in the region were the following: Government (17.62% or 233,853 jobs), Retail Trade (12.91% or 171,405 jobs), Healthcare and Social Assistance (12.84% or 170,431 jobs), Accommodation and Food Services (9.97% or 132,410 jobs), and Administrative/Support and Waste Management/Remediation Services (7.11% or 94,319 jobs).

Between 2010 and 2015, the top five industries for employment in the region grew by the following: Government (-0.14% or -330 jobs), Retail Trade (11% or 16,642 jobs), Healthcare and Social Assistance (45% or 53,705 jobs), Accommodation and Food Services (23% or 24,840 jobs), and Administrative/Support and Waste Management/Remediation Services (13.9% or 3,692 jobs). Manufacturing dropped from the 5th ranked employment industry in the region to the 6th ranked employment industry.

By 2025, the top five industries for employment in the region are projected to be the following: Government (15.96% or 244,893 jobs), Healthcare and Social Assistance (14.48% or 222,162 jobs), Retail Trade (13.28% or 203,840 jobs), Accommodation and Food Services (10.28% or 157,773 jobs), and Administrative/

Support/Waste Management/Remediation Services (7.41% or 113,626 jobs).

From 2015 to 2025, the largest numerical job growth for regional employment by industry is expected to be the following: Healthcare and Social Assistance (51,731 jobs or 30.35%), Retail Trade (32,435 jobs or 18.92%), Accommodation and Food Services (25,363 jobs or 19.15%), Transportation and Warehousing (23,046 jobs or 28.75%), and Administrative/Support and Waste management/Remediation Services (19,307 jobs or 20.47%).

Exhibit 4.03 Regional Employment Projections by Industry (2010-2025)

Description	2010 Jobs	2015 Jobs	2010 - 2015 Change	2025 Jobs	2015 - 2025 Change
Government	234,183	233,853	(330)	244,893	11,040

Planning Environment - District Labor Market Information

OCCUPATION ESTIMATES AND PROJECTIONS

There are projected to be approximately 13,711 average annual openings in the service area between 2015 and 2025. Annual openings are determined by the sum of new and replacement jobs in an occupation over the selected timeframe (2015-2025) divided by the number of years in the timeframe. Of these annual openings, 8,558 (62.41%) have a typical entry level education of a high school diploma/equivalent or less, 278 (2.03%) have a typical entry level education of some college, 1,337 (9.75%) have a typical entry level education of a postsecondary non-degree award, 279 (2.04%) have a typical entry level education of an Associate's degree, 2,579 have a typical entry level education of a Bachelor's degree, and 681 (4.96%) have a typical entry level education of a Master's degree or higher.

It should be noted that occupations with an average hourly wage of less than \$12 were excluded, as were those occupations with insufficient data to determine average hourly wages. Additionally, typical entry level education required is determined by the minimum qualifications identified by the U.S. Department of Labor and Bureau of Labor Statistics. Although a job may be identified as requiring a typical entry level education of a high school diploma or equivalent, in many circumstances the Department of Labor and Bureau of

Labor Statistics recommends some level of continuing higher education to be competitive for obtaining that particular job.

Of the occupations with the most expected annual openings within the SBCCD service area by the year 2025, SBVC may be in a position to provide instruction that would supply workers for the following jobs: registered nurses, nursing assistants, licensed practical and licensed vocational nurses, medical assistants, home health aides, elementary and postsecondary teachers, teacher assistants, substitute teachers, general and operations managers, customer service representatives, first-line supervisors of office/administrative support/retail sales/food prep. workers, sales representatives in wholesale and manufacturing, secretaries/administrative assistants, office clerks, accountants/auditors, maintenance and repair workers, and automotive service technicians/mechanics.

Of the occupations with the most expected annual openings within the District's service area by the year 2025, CHC may be in a position to provide instruction that would supply workers for the following jobs: registered nurses, nursing assistants, licensed practical/vocational nurses, home health aides, medical

assistants, medical secretaries, elementary and postsecondary teachers, teacher assistants, substitute teachers, customer service representatives, general and operations managers, first-line supervisors of office/administrative support/retail sales/food prep. workers, sales representatives in wholesale and manufacturing, secretaries/administrative assistants, office clerks, and accountants/auditors.

For a full listing of average annual job openings by occupation in the service area please refer to the openings by occupation section of the *Appendix*.

Planning Environment - District Labor Market Information

OCCUPATION ESTIMATES AND PROJECTIONS *(cont.)*

Of the projected 13,711 average annual job openings between 2015 and 2025 in the District's service area, approximately 7,620 openings belong to occupations that are related to programs offered by SBVC. An occupation was determined to be related to a program if the program prepared an individual for employment in the occupation or for transfer to another program that would prepare the individual for employment in the occupation (for example, a background in psychology may prepare a student for medical school to eventually become a psychiatrist, thus, the psychiatrist occupation is considered to be related to SBVC's psychology program). Approximately 3,451 openings (45.29%) have a typical entry level education of a high school diploma/ equivalent or less, 273 (3.58%) have a typical entry level education of some college, 763 (10.01%) have a typical entry level education of a postsecondary non-degree award, 197 (2.59%) have a typical entry level education of an Associate's degree, 2,452 (32.18%) have a typical entry level education of a Bachelor's degree, and 483 (6.34%) have a typical entry level education of a Master's degree or higher.

Statistics. Although a job may be identified as requiring a typical entry level education of a high school diploma or equivalent, in many circumstances the Department of Labor and Bureau of Labor Statistics recommends some level of continuing higher education to be competitive for obtaining that particular job.

Please note that typical entry level education required is determined by the minimum qualifications identified by the U.S. Department of Labor and Bureau of Labor

Planning Environment - District Labor Market Information

OCCUPATION ESTIMATES AND PROJECTIONS *(cont.)*

Of the projected 13,711 average annual job openings between 2015 and 2025 in the District's service area, approximately 5,922 openings belong to occupations that are related to programs offered by CHC. An occupation was determined to be related to a program if the program prepared an individual for employment in the occupation or for transfer to another program that would prepare the individual for employment in the occupation (for example, CHC's biology program often feeds into several nursing programs in the area, thus, nursing occupations are considered to be related to CHC's biology program). Approximately 1,928 openings (32.55%) have a typical entry level education of a high school diploma/equivalent or less, 267 (4.52%) have a typical entry level education of some college, 600 (10.13%) have a typical entry level education of a postsecondary non-degree award, 231 (3.9%) have a typical entry level education of an Associate's degree, 2,415 (40.77%) have a typical entry level education of a Bachelor's degree, and 482 (8.13%) have a typical entry level education of a Master's degree or higher

Planning Environment - District Labor Market Information

OCCUPATION ESTIMATES AND PROJECTIONS *(cont.)*

There are projected to be approximately 46,547 average annual job openings between 2015 and 2025 in the region. Of these annual openings, 30,201 (64.88%) typically require an entry level education of a high school diploma/equivalent or less, 865 (1.86%) typically require an entry level education of some college, 4,027 (8.65%) typically require an entry level education of a postsecondary non-degree award, 922 (1.98%) typically require an entry level education of an Associate's degree, 8,393 (18.03%) typically require an entry level education of a Bachelor's degree, and 2,138 (4.59%) typically require an entry level education of a Master's degree or higher.

Again, it should be noted that occupations with an average hourly wage of less than \$12 were excluded, as were those occupations with insufficient data to determine average hourly wages. Additionally, typical entry level education is determined by the minimum qualifications identified by the U.S. Department of Labor and Bureau of Labor Statistics. Although a job may be identified as requiring a typical entry level education of a high school diploma or equivalent, in many circumstances the Department of Labor and Bureau of Labor Statistics recommend some level of continuing higher education in order to be competitive in obtaining that particular job.

Planning Environment - District Labor Market Information

LABOR MARKET INFORMATION FINDINGS

Analysis of data regarding the labor market in the service area and region provides insight for making informed planning decisions. The following findings are derived from the labor market information presented in this chapter of the EMP:

Labor Force, Employment and Unemployment

- › The labor force for 2015 was:
 - › 746,200 in the service area
 - › 1,961,800 in the region
 - › 18,981,800 in the state
- › The number of employed persons in 2015 was:
 - › 698,900 in the service area
 - › 1,832,300 in the region
 - › 17,798,600 in the state
- › The unemployment rate for 2015 was:
 - › 6.38% in the service area
 - › 6.6% in the region
 - › 6.2% in the state

Industry Estimates and Projections

- › In 2015, the top five industries in the service area in terms of people employed were:
 - › Healthcare and Social Assistance (67,427 jobs) – 53% growth since 2010

- › Government (52,344 jobs) – 2% growth since 2010
- › Retail Trade (47,720 jobs) – 9% growth since 2010
- › Accommodation and Food Services (34,006 jobs) – 22% growth since 2010
- › Transportation and Warehousing (32,044 jobs) – 44% growth since 2010
- › By 2025, the top five industries in the service area in terms of people employed are projected to be:
 - › Healthcare and Social Assistance (20,244 jobs) – 30.02% growth since 2015
 - › Government (55,969 jobs) – 6.93% growth since 2015
 - › Retail Trade (55,456 jobs) – 16.21% growth since 2015
 - › Transportation and Warehousing (42,652 jobs) – 33.1% growth since 2015
 - › Accommodation and Food Services (41,418 jobs) – 21.8% growth since 2015

- › In 2015, the top five industries in the region in terms of people employed were:
 - › Government (233,853 jobs) – 0.14% decline from 2010

- › Retail Trade (171,405 jobs) – 10.75% growth from 2010
- › Healthcare and Social Assistance (170,431 jobs) – 45.23% growth from 2010
- › Accommodation and Food Services (132,410 jobs) – 23.09% growth from 2010
- › Administrative/Support and Waste Management/Remediation Services (94,319 jobs) – 21.09% growth from 2010
- › By 2025, the top five industries in the region in terms of people employed are projected to be:
 - › Government (244,893 jobs) – 4.72% growth from 2015
 - › Healthcare and Social Assistance (222,162 jobs) – 30.35% growth from 2015
 - › Retail Trade (203,840 jobs) – 18.92% growth from 2015
 - › Accommodation and Food Services (157,773 jobs) – 19.15% growth from 2015
 - › Administrative/Support and Waste Management/Remediation Services (113,626 jobs) – 20.47% growth from 2015

2015

Occupation Estimates and Projections

- › There are projected to be approximately 13,711 average annual occupation openings in the District service area between 2015 and 2025, excluding occupations with an average hourly wage of less than \$12 and occupations with insufficient data to determine average hourly wages. The 13,711 annual openings can be broken down by typical entry level education as follows:
 - › 3,573 (26.06%) openings – no formal education credential
 - › 4,985 (36.35%) openings – high school diploma or equivalent
 - › 278 (2.03%) openings – some college
 - › 1,337 (9.75%) openings – postsecondary non-degree award
 - › 279 (2.04%) openings – Associate's degree
 - › 2,579 (18.81%) openings – Bachelor's degree
 - › 273 (1.99%) openings – Master's degree
 - › 408 (2.97%) openings – Doctoral or Professional degree
- › Of the top thirty annual job openings within the

District service area between 2015 and 2025, approximately 1,164 openings are related to medical occupations, 1,908 are related to business occupations, and 635 are related to education/teaching.

- › Of the projected 13,711 average annual occupation openings in the District service area between 2015 and 2025, approximately 7,620 openings belong to occupations that are related to programs offered by SBVC. The 7,620 openings can be broken down by typical entry level education as follows:
 - › 305 (4%) openings – no formal education credential
 - › 3,147 (41.3%) openings – high school diploma or equivalent
 - › 273 (3.58%) openings – some college
 - › 763 (10.01%) openings – postsecondary non-degree award
 - › 197 (2.59%) openings – Associate's degree
 - › 2,452 (32.18%) openings – Bachelor's degree
 - › 243 (3.19%) openings – Master's degree
 - › 240 (3.15%) openings – Doctoral or professional degree

- › The programs offered by SBVC with the highest number of related average annual openings in the District service area between 2015 and 2025 are the following:
 - › Business Administration (22.46% or 1,712 openings)
 - › Nursing (18.74% or 1,428 openings)
 - › Child Development/Education (12.52% or 546 openings)
 - › Accounting (6.56% or 500 openings)
 - › Automotive Technology (5.52% or 421 openings)
- › The District service area average annual openings that have a typical entry level education of a postsecondary non-degree award or higher between 2015 and 2025 are expected to primarily relate to the following programs offered by SBVC:
 - › Nursing (28.4% or 1,106 openings)
 - › Business Administration (18.66% or 727 openings)
 - › Child Development/Education (17.34% or 676 openings)
 - › Accounting (6.12% or 239 openings)

Planning Environment - District Labor Market Information

LABOR MARKET INFORMATION FINDINGS *(cont.)*

- › Human Services (5.63% or 219 openings)
- › Of the projected 13,711 average annual occupation openings in the District service area between 2015 and 2025, approximately 5,922 openings belong to occupations that are related to programs offered by CHC. The 5,922 openings can be broken down by typical entry level education as follows:
 - › 203 (3.42%) openings – no formal education credential
 - › 1,725 (29.13%) openings – high school diploma or equivalent
 - › 267 (4.52%) openings – some college
 - › 600 (10.13%) openings – postsecondary non-degree award
 - › 231 (3.9%) openings – Associate's degree
 - › 2,415 (40.77%) openings – Bachelor's degree
 - › 242 (4.08%) openings – Master's degree
 - › 240 (4.05%) openings – Doctoral or professional degree
- › The programs offered by CHC with the highest number of related average annual openings in the District service area between 2015 and 2025 are the following:
 - › Business Administration (28.63% or 1,696 openings)
 - › Biology (25.16% or 1,490 openings)
 - › Child Development/Education (16.11% or 954 openings)
 - › Accounting (8.44% or 500 openings)
 - › Psychology (5.18% or 307 openings)
- › The District service area average annual openings that have a typical entry level education of a postsecondary non-degree award or higher between 2015 and 2025 are expected to primarily relate to the following programs offered by CHC:
 - › Biology (33.55% or 1,251 openings)
 - › Business Administration (19.51% or 727 openings)
 - › Child Development/Education (18.12% or 676 openings)
 - › Psychology (6.48% or 242 openings)
 - › Accounting (6.4% or 239 openings)
- › There are projected to be approximately 46,547 average annual job openings between 2015 and 2025 in the region, excluding occupations with an average hourly wage of less than \$12 and occupations with insufficient data to determine hourly wages. The 46,547 openings can be broken down by typical entry level education as follows:
 - › 12,462 (26.77%) openings – no formal education credential
 - › 17,739 (38.11%) openings – high school diploma or equivalent
 - › 865 (1.86%) openings – some college
 - › 4,027 (8.65%) openings – postsecondary non-degree award
 - › 922 (1.98%) openings – Associate's degree
 - › 8,393 (18.03%) openings – Bachelor's degree
 - › 817 (1.75%) openings – Master's degree
 - › 1,322 (2.84%) openings – Doctoral or professional degree
- › Of the top thirty annual occupation openings within the region between 2015 and 2025, approximately 6,007 annual openings are related to business occupations, 2,779 openings are related to medical/healthcare occupations, and 1,561 openings are related to education/teaching occupations.
- › Of the 46,547 average annual job openings

between 2015 and 2025 in the region, approximately 25,288 openings belong to occupations related to programs offered by SBVC. The 25,288 openings can be broken down by typical entry level education as follows:

- › 825 (3.26%) openings – no formal education credential
 - › 11,226 (44.39%) openings – high school diploma or equivalent
 - › 851 (3.37%) openings – some college
 - › 2,278 (9.01%) openings – postsecondary non-degree award
 - › 673 (2.66%) openings – Associate's degree
 - › 7,967 (31.51%) openings – Bachelor's degree
 - › 718 (2.84%) openings – Master's degree
 - › 750 (2.97%) openings – Doctoral or professional degree
- › The programs offered at SBVC with the highest number of related average annual openings in the region between 2015 and 2025 are the following:
- › Business Administration (23.2% or 5,867 openings)
- › The regional job openings that have a typical entry level education of at least a postsecondary non-degree award or higher between 2015 and 2025 are expected to primarily relate to the following programs offered by SBVC:
- › Nursing (15.39% or 3,892 openings)
 - › Child Development/Education (11.09% or 2,804 openings)
 - › Accounting (6.21% or 1,570 openings)
 - › Administration of Justice/Corrections (5.8% or 1,467 openings)
- › The programs offered by CHC with the highest number of related average annual openings in the region between 2015 and 2025 are the following:
- › Business Administration (30.7% or 5,804 openings)
 - › Biology (21.65% or 4,094 openings)
 - › Child Development/Education (14.83% or 2,804 openings)
 - › Accounting (8.31% or 1,572 openings)
 - › Communication Studies (5.74% or 1,085 openings)
- › Of the 46,547 average annual openings in the region between 2015 and 2025, approximately 18,907 openings belong to occupations related to programs offered by CHC. Those 18,907 openings can be broken down by typical entry level education as follows:
- › 514 (2.72%) openings – no formal education credential
 - › 5,719 (30.25%) openings – high school diploma or equivalent
 - › 824 (4.36%) openings – some college
 - › 1,852 (9.8%) openings – postsecondary non-degree award
 - › 750 (3.97%) openings – Associate's degree
 - › 7,802 (41.26%) openings – Bachelor's degree
 - › 705 (3.73%) openings – Master's degree
 - › 743 (3.93%) openings – Doctoral or professional degree

Planning Environment - District Labor Market Information

LABOR MARKET INFORMATION FINDINGS *(cont.)*

- › The regional job openings that have a typical entry level education of at least a postsecondary non-degree award or higher between 2015 and 2025 are expected to primarily relate to the following programs offered by CHC:
 - › Biology (29.27% or 3,469 openings)
 - › Business Administration (21.37% or 2,533 openings)
 - › Child Development/Education (16.85% or 1,997 openings)
 - › Accounting (6.64% or 787 openings)
 - › Psychology (6.24% or 739 openings)

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT

Crafton Hills College | San Bernardino Valley College | Economic Development & Corporate Training | KVCR TV-FM

Internal + External Scan Comparison

Data from the internal and external scans provides insight into the demographics of the internal profile of the Colleges and District, as well the external community that the colleges and District serve. This section will summarize and present the findings from consideration of the internal and external scan data together, in context.

Internal + External Scan Comparison

CONSIDERATIONS FROM INTERNAL AND EXTERNAL SCAN DATA COMPARISON

Participation Rate may be defined as the number of headcount students the District enrolls for every 1,000 persons within the service area population. During the 2014-15 academic year, SBCCD had a participation rate of 17.77 students per 1,000 persons in the service area. During the most recent enrollment peak (2008-09) the District's participation rate was 23.69 students per 1,000 persons within the service area. The statewide California Community College participation rate is approximately 54 students per 1,000 students within the total population. There is a significant opportunity for the SBCCD to increase its participation rate.

Exhibit 5.01 Participation Rate (per 1,000 Persons in Total Population)

Source: SBCCD Office of Institutional Effectiveness, Research & Planning; EMSI

Internal + External Scan Comparison

CONSIDERATIONS FROM INTERNAL + EXTERNAL SCAN DATA COMPARISON *(cont.)*

While service area population age 20-29 years old increased by 34,738 persons from 2010 to 2015, enrollment of students age 20-29 years old increased by only 42 students from 2010-11 to 2014-15. Between 2015 and 2025, the 20-29 year old age group within the service area is projected to decrease by 28,269 persons (-11.64%). The District cannot rely on population growth as a major contributor to enrollment growth and should focus efforts on attracting a larger portion of persons within its core District demographic.

During the fall 2014 term SBCCD enrolled 147 first-time college students from Colton High School. During the 2014-15 academic year Colton High School produced 389 graduates. It is reasonable to expect that some of the fall 2014 enrollment to the SBCCD from Colton High School graduates were not from the graduating class of 2013-14. However, assuming that the first-time college students from Colton High School enrolling in SBCCD in fall 2014 were from the graduating class of 2013-14, then approximately 37.79% of Colton High School graduates from the class of 2013-14 enrolled in either SBVC or CHC in the fall of 2014. Making the same assumptions about other high schools, then SBCCD captured approximately 32.38% of Yucaipa High School's graduating class of 2013-14, 28.6% of

Redlands East Valley High's graduating class of 2013-14, 27.74% of San Geronio High School's graduating class of 2013-14, and 27.71% of Pacific High School's graduating class of 2013-14. The District captured less than 20% of 2013-14 graduates from Cajon, San Andreas, Arroyo Valley, Sierra, Eisenhower Senior, Rialto, Grand Terrace, Beaumont Senior, Wilmer Amina Carter, Bloomington, Banning, Fontana, and Rim of the World Senior High Schools. There exists an opportunity for the District to capture a larger proportion of feeder high school graduates.

Exhibit 5.02 Percentage of High School Graduates Captured in First-Time College Student Enrollment

High School	Fall 2010	Fall 2011	Fall 2012	Fall 2013	Fall 2014	Average

Source: SBCCD Office of Research, Planning and Institutional Effectiveness; California Department of Education, DataQuest

During the fall 2014 term, SBCCD produced 21,843 WSCH from English, however, 4,284 WSCH (19.61% of total English WSCH) was attributable to basic skills English courses (in this case, basic skills courses are defined as all English courses coded 900-999). English as a Second Language (ESL) courses accounted for 718 WSCH, of which 100% was considered basic skills. Reading and study skills courses accounted for 5,277 WSCH, of which 100% was considered basic skills. Combined, English, ESL, and reading and study skills courses accounted for 27,838 WSCH during fall 2014, of which 10,279 WSCH can be attributed to basic skills courses (36.92%). The high demand for basic skills English instruction is supported by CAASPP scores for students within the top ten feeder high schools to the District. When averaged, slightly over half of students from the top ten feeder high schools met or exceeded the standards for English (52%). Approximately one-third of all WSCH generated in English courses (English, ESL, and reading and study skills courses) in fall 2014 can be attributed to basic skills courses (36.92%). The District has an opportunity to further address the needs of unprepared/underprepared students and assume a leadership role in providing basic skills English instruction in the area.

During the fall 2014 term, SBCCD produced 29,722 WSCH from mathematics courses, of which 6,671 WSCH (22.44%) can be attributable to basic skills courses (in this case, basic skills courses are defined as all mathematics courses coded 900-999). Given that the average CAASPP score of students from the top ten feeder high schools to the District reveals that one quarter (25%) of students from the top ten feeder high schools met or exceeded the standards for mathematics, it is surprising that WSCH generated from basic skills mathematics courses does not constitute a larger proportion of total WSCH produced by mathematics courses. That being said, the District still has an opportunity to further address the needs of unprepared/underprepared students and assume a leadership role in providing basic skills mathematics instruction in the area.

In fall of 2014, SBCCD produced 19,596 WSCH from CTE designated courses (9.42% of total WSCH). Between 2015 and 2025, there are projected to be 1,497 average annual job openings for occupations related to designated CTE programs offered by SBVC and CHC within the District service area (10.92% of all service area average annual openings with average hourly wages of \$12 or higher). There are projected to

be approximately 5,231 average annual job openings for occupations related to designated CTE programs offered by SBVC and CHC within the region during the same time period (11.24% of all regional average annual openings with hourly wages of \$12 or higher). The District has an opportunity to expand its offerings of CTE courses to meet the anticipated future demand for skilled vocationally trained workers in the service area and region.

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT

Crafton Hills College | San Bernardino Valley College | Economic Development & Corporate Training | KVCR TV-FM

Challenges Facing the District + Colleges

This chapter will identify and examine the challenges that the SBCCD faces to support the needs of each of its Colleges. Challenges will be identified by analyzing qualitative data (program and department interviews) and quantitative data (internal and external scans) and are listed here so that the District may be better equipped to address the needs of the Colleges.

Challenges Facing the District + Colleges

CHALLENGES FACED BY THE COLLEGES

Full-time to Part-time Faculty Ratio:

On average, from fall 2010 to fall 2014, adjunct faculty outnumbered full-time faculty by more than two to one (218.2 average full-time faculty to 502 adjunct faculty). Additionally, full-time faculty decreased by 7 employees during that same time period while adjunct faculty increased by 83 employees. This creates a challenge for developing, running, and growing instructional programs.

In fall 2014, 73% of District faculty was adjunct while 27% was full-time faculty. In comparison, during the same term at Riverside Community College District, 51% of faculty was part-time and 49% was full-time faculty.

Employee Retirements:

In fall 2014, 352 employees within the District belonged to the 50-59 age group (28.69%) and 247 employees were age 60 or older (20.13%). This suggests that it may be reasonable to expect that approximately 49% of the District's employees will retire within the next 15 years.

Enrollment Trends:

From 2008-09 to 2012-13 overall District enrollment decreased an average of 7.65% annually. This decline

coincides with the "Great Recession," and can be argued to be an effect of the economic downturn, budget cuts, and annual budget uncertainty. More recently, from 2012-13 to 2014-15, overall District enrollment increased an average of 5.49% annually. As of 2014-15, District enrollment (25,675 students) has not reached the most recent peak in 2008-09 (31,716 students) or its enrollment in 2005-06 (27,808 students).

Additionally, while service area population age 20-29 years old increased by 34,738 persons from 2010 to 2015, enrollment from students age 20-29 years old increased by only 42 students from 2010-11 to 2014-15. The population of people age 20-29 within the service area is projected to decrease by 28,269 persons (-11.64%) from 2015 to 2025.

Assuming that the fall 2014 enrollment from feeder high schools is composed of graduates from the 2013-14 school year, SBCCD captured on average 24.02% of the 2013-14 graduates from its top 26 feeder high schools (graduate data was not available for Aquinas High School, Arrowhead Christian Academy, and Other/ Home School).

During the District's most recent enrollment peak (2008-09), the participation rate was 23.69 students per every 1,000 persons within the service area. In 2014-15, the District participation rate decreased to 17.77 students per every 1,000 persons within the service area. In comparison the statewide participation rate is approximately 54 students per 1,000 persons with in the state. The District has an opportunity to increase enrollment by capturing more persons from within its primary service area.

While enrollment is currently increasing within the District, it is reasonable to expect that the District cannot rely upon population growth as a major contributor to enrollment growth in the next 10 years. Additionally, the District captured, on average, less than a quarter of the graduates from its top feeder high schools in fall 2014. The District's enrollment is also heavily influenced by economic factors, as evidenced by the declines in enrollment during the "Great Recession." Per capita income in the service area is \$22,011, which is \$7,895 less than the statewide average. Furthermore, 16% of service area families are below the poverty line as compared to 12.3% of statewide families.

Unprepared and Underprepared Students:

36.92% of all WSCH generated by English courses in the District during the fall 2014 term is attributable to basic skills courses. 22.44% of all WSCH generated by mathematics courses in the District during the fall 2014 term is attributable to basic skills courses. The average CAASPP scores of students from the top ten feeder high schools to the District in the 2014-15 academic year reveal that 52% of students met or exceeded the standards for English and 25% of students met or exceeded the standards for mathematics.

Regional Efforts for Adult Education:

Over half of the District's service area residents age 25 and over do not have any higher education experience and approximately 25% do not have a high school diploma or equivalent. GED preparation and adult education end at the 10th grade level, which leaves a sizeable knowledge and skills gap for students who want to enroll in community college. A strain has been placed on the Colleges to provide sufficient remedial/basic skills instruction for students who place below college-level courses. The District has made significant efforts in working with the Inland Adult Education Consortium to enhance pathways between regional adult education programs and approved programs of

study and/or career pathways at each College. These efforts and plans to address regional adult education needs may be found in the Inland Adult Education Consortium's *AB86 Regional Comprehensive Plan*, which was finalized in March 2015.

Alternative Instructional Delivery Methods:

From 2010-11 to 2014-15, enrollment in face-to-face only courses decreased by 4,597 students (-22.3%) and hybrid-only enrollment decreased by 32 students (-11.39%). During the same time period, students who enrolled in online-only classes increased by 423 students (85.8%) and enrollment in courses with multiple instructional methods increased by 1,860 students (28.04%). The number and proportion of students enrolling in traditional face-to-face only instruction has been declining and shifting to students utilizing online courses and multiple instructional methods for their courses.

With the District's transition to the Canvas Learning Management System, there may be opportunities for professional development, including training on the use of Canvas and instructional design. As of spring 2015, 44 faculty at Crafton Hills College are approved to teach online. The number of faculty approved to teach online at San Bernardino Valley College is unavailable.

While there are multiple computer labs at each campus, concerns were raised related to student access to technology, including a limited number of computer workstations and scheduling conflicts of computer lab facilities and a lack of necessary course specific software and hardware.

Productivity & WSCH Generation:

From 2011-12 to 2014-15, course offerings increased in the District by 1,228 sections (34.82%), while WSCH per section offered decreased from 117.58 WSCH per section to 94.99 WSCH per section (-19.21%). Productivity, defined here as WSCH per FTEF, has declined in the District from 2010-11 to 2014-15. 527.43 WSCH was generated per FTEF in 2010-11 and 455.78 WSCH was generated per FTEF in 2014-15, a decrease in productivity by -13.58% (-71.65 WSCH per FTEF).

Challenges Facing the District + Colleges

CHALLENGES FACED BY THE COLLEGES *(cont.)*

Facilities:

According to Title 5 standards for a college that generates less than 140,000 WSCH per semester, classrooms shall be utilized no less than 48 hours per week and laboratories 27.5 hours per week to achieve minimum qualifications for efficient room usage. The Crafton Hills College Fall 2014 Space Utilization prepared by ALMA Strategies and HMC Architects identifies two buildings at CHC that have an overall average laboratory utilization that exceeds the Title 5 standard. No buildings had an overall average classroom utilization that met the Title 5 standard. The closest building to the state standard for efficient classroom utilization was East Complex 2, with an average building-wide classroom utilization of 47.03 per week. Overall, five buildings had an overall average utilization of 90% or higher, three buildings had an average overall utilization between 80-89%, two buildings had an overall average utilization between 70-79%, and no building had an overall average utilization of less than 59% of the recommended standard for utilization.

Two classrooms at CHC exceeded the minimum qualifications for efficient room usage of 48 hours per week; 22 classrooms were utilized for 80% of the Title

5 standard; two classrooms were utilized for 71-80% of the Title 5 standard; and three classrooms were utilized for 55-69% of the Title 5 standard.

Eight laboratories at CHC exceeded the minimum qualifications for efficient room usage of 27.5 hours per week. 11 laboratories were utilized for more than 81% of the Title 5 standard; three laboratories were utilized for 71-80% of the Title 5 standard; three laboratories were utilized for 61-70% of the Title 5 standard; one laboratory was utilized for 51-60% of the Title 5 standard for lab utilization; two laboratories were utilized for 41-50% of the Title 5 standard; and three laboratories were utilized for less than 40% of the Title 5 standard.

The San Bernardino Valley College Fall 2014 Space Utilization prepared by ALMA Strategies and HMC Architects identifies one building at SBVC that exceeded the Title 5 standard for laboratory utilization, and one building that almost met the Title 5 standard with an average building-wide laboratory utilization of 26.9 hours per week. No buildings had an overall average classroom utilization that met the Title 5 standard. The closest building to the state standard for classroom utilization was North Hall with an average

building-wide classroom utilization of 35.96 hours per week. Overall, no buildings had an average utilization of 80% or higher; three buildings had an overall average utilization between 70-70%; three buildings had an overall average utilization between 60-69%; three buildings had an overall average utilization between 50-59%; and two buildings had an overall average utilization below 20%.

Two classrooms at SBVC exceeded the minimum qualifications for efficient room usage of 53 hours per week; 10 classrooms were utilized for more than 81% of the Title 5 standard; eight classrooms were utilized for 71-80% of the Title 5 standard; 13 classrooms were utilized for 61-70% of the Title 5 standard; 19 classrooms were utilized for 51-60% of the Title 5 standard; 16 classrooms were utilized for 41-50% of the Title 5 standard; and 14 classrooms were utilized for less than 40% of the Title 5 standard.

12 laboratories at SBVC exceeded the minimum qualifications for efficient room usage of 27.5 hours per week, and one almost met the standard with a utilization of 27.3 hours per week. 24 laboratories were utilized for more than 81% of the Title 5 standard; seven laboratories were utilized for 71-80% of the Title

5 standard; nine laboratories were utilized for 61-70% of the Title 5 standard; five laboratories were utilized for 51-60% of the Title 5 standard; three laboratories were utilized for 41-50% of the Title 5 standard; and seven laboratories were utilized for less than 40% of the Title 5 standard.

In the year 2009, the District consisted of 638,178 assignable square footage (ASF) of space, and 892,111 gross square footage (GSF). By the year 2015, the District's facilities space inventory increased to 757,100 ASF and 1,027,244 GSF. The District currently does not have a facilities department with staffing to support capital construction planning, manage construction projects, coordinate sustainability practices, or oversee/integrate maintenance and operations. The District often must rely on consultants with capital outlay planning and program/construction management. Furthermore, each College's Vice President of Administration must take on much of the workload related to facilities planning and management. Maintenance and Operations staff at each College are challenged to keep pace with the maintenance needs of aging facilities and infrastructure.

Site Safety and Emergency Preparedness

The District, along with support from District Police is responsible for safety and security of all students and employees. Challenges include prioritizing resources for ensuring proper hazardous materials handling, crime prevention, loss-control, accidents, and reacting to possible emergency situations (e.g. earthquakes, wildfire, and active shooter situations).

Updating Planning Documents

The cycle for updating key planning documents within the District and at each College is not in sync, which consequentially creates inefficiencies when implementing planning goals/objectives. Many key planning documents are integrated with each other, such as the *Strategic Plan*, *Educational Master Plan* and *Facilities Master Plan*. If the timing for updating such planning documents is not coordinated efficiently, then these documents become out-of-date and information becomes stale. It would be beneficial for the District to create and implement a schedule for the updating of major planning documents and key planning components that inform plans, such as program review and environmental scans.

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT

Crafton Hills College | San Bernardino Valley College | Economic Development & Corporate Training | KVCR TV-FM

District Strategic Directions

The District's strategic goals and objectives were defined through the collegial consultation process and are included in the District's *2014-2020 Strategic Plan*.

District Strategic Directions

GOAL 1: STUDENT SUCCESS

Provide the programs and services necessary to enable all students to achieve their educational and career goals.

Objective 1.1:

Increase student success while preserving access, enhancing quality, and reducing attainment gaps associated with income, race, ethnicity, age, and gender.

1.1.1: Increase the graduation rate from 16% to 20% by 2019-2020 as measured by the Student Success Scorecard.

1.1.2: Increase the transfer rate from 32% to 39% by 2019-2020 as measured by the Student Success Scorecard.

1.1.3: Increase the percentage of students with a complete educational plan to 100% by 2019-2020 as measured by data collected in Ellucian.

1.1.4: Increase the percentage of students who have completed their educational plan to 50% by 2019-2020 as measured by data collected in Ellucian.

Key Strategies:

- › Expand and diversify professional development.
 - › Alternative instructional methods
- › Expand student support services.
 - › Expand tutoring
 - › Expand learning communities
 - › Enhance early alert intervention
 - › Implement degree audit
 - › Expand accelerated courses
 - › Empower students to become continuous learners (study skills)
- › Expand academic advising.
- › Align curricular pathways with K-12 and 4-year partners (activities include conducting a sequencing study, etc.).
- › Ensure accurate student placement.
- › Increase student engagement (learning communities, mentor programs, supplemental instruction, etc.).

Objective 1.2

Increase the number of students who complete developmental education programs and progress to successful completion of freshman-level courses.

1.2.1: Increase the three-year throughput rate of students who first enroll in math developmental courses from 20% to 29% by 2019-2020, as measured by the CCCC Basic Skills Progress Tracker.

1.2.2: Increase the three-year throughput rate of students who first enroll in English developmental courses from 48% to 60% by 2019-2020, as measured by the CCCC Basic Skills Progress Tracker.

Key Strategies:

- › Work with K-12 before students enroll at SBCCD.
- › Increase and improve basic skills offerings, including alternative instructional delivery methods.
- › Determine optimum class size and teaching strategies in developmental courses.
- › Develop non-credit courses for basic skills program.
- › Enhance tutoring and student mentoring.
- › Require early and continuous enrollment in math and English.

District Strategic Directions

GOAL 2: ENROLLMENT AND ACCESS

Increase access to higher education for populations in our region.

Objective 2.1

Increase our student population to improve the higher education participation rate and supply a well-equipped, educated workforce for our communities.

2.1.1: Increase the annual District-wide RFTES enrollment from 13,241 in 2012-2013 to 15,000 in 2019-2020 as measured by the RFTES generated by each College.

2.1.2: Increase the percentage of community college students by the SBCCD (i.e. market share) to 74% by 2019-2020 as measured by community college enrollments by zip code.

Key Strategies:

- › Develop and implement a comprehensive marketing plan to increase market share.
 - › Promote a culture of educational value throughout the community.
- › Increase online, evening, and weekend classes.
- › Offer concurrent college courses on K-12 campuses and at SBCCD campuses.

- › Increase community involvement at cultural and athletic events on campus.
- › Develop a comprehensive international student program.

Objective 2.2

Provide transfer, career and technical, and developmental education access to meet student needs.

2.2.1: Increase the transfer course FTES generated in an academic year from 9,317 in 2012-13 to 10,545 in 2019-2020, as measured by the total FTES generated by each College.

2.2.2: Increase the CTE course FTES generated in an academic year from 3,728 in 2012-2013 to 4,219 in 2019-2020, as measured by the total FTES generated by each College.

2.2.3: Increase the developmental course FTES generated in an academic year from 2,146 in 2012-13 to 2,429 in 2019-2020, as measured by the total FTES generated by each College.

Key Strategies:

- › Use data to inform plans to grow new programs to meet labor market needs.
- › Provide flexible delivery of instructional offerings.
- › Revise program viability plans to streamline instructional offerings.
- › Develop and implement an enrollment management and growth plan.

Objective 2.3

Enhance the public image of the San Bernardino Community College District.

Key Strategies:

- › Utilize KVCR and EDCT as resources to enhance SBCCD's public image.
- › Assess the District's public image and develop and implement a plan based on the assessment's results.
- › Increase media presence and coverage of the District's accomplishments and performance results.
- › Expand campus festivals and events.
- › Increase faculty, staff, and student involvement in local community organizations.
- › Expand outreach events.

Objective 2.4

Increase awareness of San Bernardino Valley College and Crafton Hills College as viable higher education options.

Key Strategies:

- › Work with K-12 counselors to increase awareness in K-12 communities.
- › Utilize all media resources to increase awareness.
- › Focus the District's message on quality of education, affordability, value, and open access.
- › Increase outreach events at local high schools and on campuses.
- › Offer courses at K-12 and employer locations.

Objective 2.5

Continue to diversify the District's student and employee populations to be reflective of the community.

Key Strategies:

- › Increase outreach to local residents.
- › Ensure salaries and benefits are at competitive rates.
- › Have multilingual and multicultural marketing materials.
- › Market and outreach to potential students and employees who are reflective of demographic trends.

District Strategic Directions

GOAL 3: PARTNERSHIPS OF STRATEGIC IMPORTANCE

Invest in strategic relationships and collaborate with partners in higher education, Pre-K—12 education, business and workforce development, government, and other community organizations.

Objective 3.1

Enhance existing and secure new higher education partnerships to improve student transfer rates.

Key Strategies:

- › Align course curriculum to enhance strategic partnerships.
- › Strategically develop new courses and programs.
- › Create consortium of higher education partners to focus on improving student transfer rates.
- › Expand Transfer Model Curriculum.

Examples of Potential Strategic Partners:

- › Mt. San Jacinto College
- › California State University, San Bernardino (CSUSB)
- › University of Redlands
- › University of California, Riverside (UCR)
- › University of California, Los Angeles (UCLA)
- › Brandman University

Objective 3.2

Enhance existing and secure new Pre-K—12 partnerships to improve student pathways; increase awareness of SBVC and CHC as viable options for higher education; and enhance the image of the San Bernardino Community College District.

Key Strategies:

- › Align course curriculum to enhance strategic partnerships.
- › Work with Pre-K—12 partners to develop a communications campaign with the intent of sharing with local high school students and parents.
- › Develop common standards with K-12.
- › Develop Dual Enrollment Strategies.

Examples of Potential Strategic Partners:

- › Redlands Unified School District
- › Yucaipa-Calimesa Joint Unified School District
- › Beaumont Unified School District
- › San Bernardino County Superintendent of Schools
- › San Bernardino City Unified School District
- › Colton Unified School District
- › Rialto Unified School District

- › Inland Leaders Charter School
- › California Department of Education
- › Hispanic Association of Colleges and Universities (HACU)
- › Middle College High School
- › San Bernardino Department of Rehabilitation
- › Job Corps
- › Native American Resource Center-Morongo
- › Sheriff's Academy
- › University of California, Los Angeles
- › Brandman University

Objective 3.3

Enhance existing and secure new business and workforce development partnerships for student internship opportunities, student pathways, incumbent worker training, and to enhance career and technical education course curriculum.

Key Strategies:

- › Work with industry partners with a history of utilizing student interns to develop internship opportunities for SBCCD students.
- › Develop and market an internship program template to make it attractive for local business partners to include student interns in their workforce.

- › Leverage grant funding to develop student internship opportunities with local employers.
- › Use technical expertise of industry partners to strengthen membership of CTE curriculum committees that will align student pathways to jobs in the community.
- › Work with industry partners to develop incumbent worker trainer programs that will retain jobs and allow local businesses to expand.
- › Work with community partners to develop short-term and long-term workforce development and community service programs to help build the local economy.
- › Offer courses at employer's worksites (contract education).

Examples of Potential Strategic Partners:

- › Workforce Investment Boards
- › Local City and County Agencies
- › Local Businesses and Non-Profit Agencies
- › Regional Fire and Law Enforcement Agencies
- › Regional Hospitals and Healthcare Providers
- › State Vice Chancellor of Workforce Development
- › Colton Redlands Yucaipa Regional Occupational Program (CRY-ROP)
- › Walmart Foundation
- › Western Association of Food Chains

- › California Alcohol and Drug Educators (CAADE)
- › City of Redlands, City of San Bernardino Water Department
- › Employee Training Agency (ETA)

Objective 3.4

Enhance existing and secure new government and community partnerships to increase funding for improving student success and increasing student access.

Key Strategies:

- › Partner with other local California community colleges to advocate for funding.
- › Provide consistent SBCCD representation at regional and state leadership organizations.
- › Work with state-level lobbying services to remain current on funding and other California community college issues and to provide feedback to local and state government officials.
- › Enhance SBCCD's value to the communities it serves through proactive efforts to be engaged in local events, and by continually demonstrating a strong commitment to developing programs and services that best serve its students, residents, and local businesses.

Examples of Potential Strategic Partners:

- › Cities of San Bernardino, Colton, Rialto, Highland, Yucaipa, Redlands, Loma Linda, Grand Terrace
- › Regional Fire and Law Enforcement Agencies
- › Regional Hospitals and Health Care Providers
- › Vice Chancellor of Workforce Development, California Community Colleges Chancellor's Office (CCCCO)
- › Workforce Investment Boards

District Strategic Directions

GOAL 4: DISTRICT OPERATIONAL SYSTEMS

Improve District systems to increase administrative and operational efficiency and effectiveness.

Objective 4.1

Improve District systems to increase administrative and operational efficiency and effectiveness with an emphasis on student records, human resources, facilities, technology, financial systems, and other workflow operational systems.

Key Strategies

- › Administrative Efficiency/Effectiveness
 - › Identify the dependencies for integrating existing major enterprise resource programs.
 - › Integrate major enterprise resource programs.
 - Align policies and procedures.
 - Purchase Human Resource, Fiscal, and other ERP modules as necessary to become independent from county systems and have a fully integrated administrative applications environment.
- › Operational Efficiency/Effectiveness
 - › Conduct Business Process Analysis (BPA) to streamline procedures within Human Resources, Business & Fiscal Services, and other District processes, as appropriate.
 - › Improve communications throughout the District.

SAN BERNARDINO COMMUNITY COLLEGE DISTRICT

Crafton Hills College | San Bernardino Valley College | Economic Development & Corporate Training | KVCR TV-FM

Recommendations

This section will present recommendations for how SBCCD may support the needs of each of its Colleges and help them achieve their strategic directions and goals. Additionally, analysis of and recommendations for how the EDCT and KVCR may support each College will be presented in this section. The following recommendations encompass how the District may support each College and are not intended to be in order of priority.

Recommendations

RECOMMENDATIONS

Recommendation 1:

Complete and regularly update the three-year staffing plan and develop a process to increase the number of full-time faculty and increase the ratio of full-time to adjunct faculty in the District.

Rationale:

- › Several programs at both Colleges either have no full-time faculty or have only one full-time faculty member. This leaves several programs without the capacity to handle administrative tasks, coordinate with other programs, conduct outreach events, and grow and develop their programs.

Related Challenges:

- › Full-time to part-time faculty ratio
- › Employee retirements

Recommendation 2:

To stabilize staffing levels, the District Human Resources department must address upcoming retirements and hiring procedures that include strategies for interviewing candidates from across the country. Additionally, consider completing a market study to understand the levels of salary, compensation, and benefits that will attract highly qualified candidates.

Rationale:

- › Approximately half of all employees are expected to retire within the next 15 years or sooner. The District Human Resources department, which oversees all hiring, must prepare for upcoming retirements and be efficient with its hiring practices/procedures.

Related Challenges:

- › Employee retirements

Recommendation 3:

Complete and regularly update the *District Enrollment Management Plan*. Support the Colleges' community outreach and marketing efforts in order to increase campus visibility, highlight instructional opportunities, and increase FTES.

Rationale:

- › There is a significant opportunity for the Colleges to increase their participation rates by enrolling a higher proportion of service area residents. Furthermore, by enrolling more service area residents and supporting students to reach their educational goals, the Colleges have an opportunity to increase the educational attainment within the service area.
- › There is a significant opportunity for the District to capture more first-time college students from its feeder high schools.

Related Challenges:

- › Enrollment trends (i.e. participation rate, capture rate from feeder high schools)
- › Productivity and WSCH generation

Recommendation 4:

Support each Colleges' effort for addressing basic skills needs.

Rationale:

- › During the fall 2014 term, approximately 37% of English WSCH and 22% of mathematics WSCH was attributable to below college level courses.
- › CAASP scores of students within the District's top feeder high schools suggest that 52% of students met or exceeded standards for English and 25% met or exceeded standards for mathematics.
- › SBCCD student cohorts from 2005-06 to 2009-10 had an average completion rate/SPAR of 37.2% within 6 years of entry, while the statewide average completion rate/SPAR was 48.1%
- › The remediation sequence may take some students as long as two years to complete and reach college-level English or mathematics.

Related Challenges:

- › Unprepared and underprepared students
- › Productivity and WSCH generation

Recommendation 5:

Support the Colleges' effort to work with K-12 entities, the EDCT, adult schools, and the Inland Adult Education Consortium to become a leader in providing education to adults in the region.

Rationale:

- › 50.64% of the service area residents age 25 and over (426,008 persons) do not have any higher education experience. The statewide average of persons age 25 and over without any higher education experience is 40.18% (9,954,719 persons).
- › There is a need to develop/establish pathways between the regional adult education programs and approved programs of study and/or career pathways at each College.

Related Challenges:

- › Regional efforts for Adult Education

Recommendations

RECOMMENDATIONS *(cont.)*

Recommendation 6:

Support Distance Education at each campus with the software, hardware, training, and support mechanisms as identified through local processes by the Colleges.

Rationale:

- › An increasing number of students are taking courses that are online only or a combination of multiple instructional delivery methods, for example, traditional face-to-face courses along with online courses.
- › Availability of training and support mechanisms for Distance Education faculty is essential for creating better access and student success in online courses.

Related Challenges:

- › Alternative instructional delivery methods
- › Productivity and WSCH generation

Recommendation 7:

Continue to sustain funding for technology in order to support the needs of students, faculty, and staff.

Rationale:

- › There is a challenge with maintaining adequate levels of funding for technology infrastructure, hardware, and software necessary to support the needs of each College. As the use and need for technology continues to grow, the District must continue to provide resources necessary to meet institutional demand.

Related Challenges:

- › Alternative instructional delivery methods
- › Facilities

Recommendation 8:

Establish a full-time and robust facilities department within the District to secure state funding through the Capital Outlay Process, manage construction projects, oversee and integrate maintenance and operations, implement design standards, coordinate sustainability efforts, and implement a Total Cost of Ownership model for facilities.

Rationale:

- › In recent years, the District has not participated in the Capital Outlay Process. As a result, the Colleges may have lost out on several opportunities to secure state funding for construction projects.
- › Many projects have been planned without considering the Total Cost of Ownership, e.g. maintenance and care of a building over its lifespan, which is by far the most expensive part of constructing a facility. For this reason, Maintenance and Operations departments should become a part of the construction planning process.

Related Challenges:

- › Facilities

Recommendation 9:

Continue to sustain funding for site security and safety and proactively design outdoor and building spaces using best practices for creating secure environments.

Rationale:

- › Ensuring the safety and security of students and employees is a primary commitment of the District. Commitment to providing the availability of resources for safety measures and emergency readiness is an important role of the District. Implementation of safety and emergency updates must be coordinated between the District, Colleges, and District Police.

Related Challenges:

- › Site safety and emergency preparedness

Recommendation 10:

Establish and maintain a cyclical process through which college planning informs the development and revision of District plans, including the *Educational Master Plan*, *Facilities Master Plan*, *College Strategic Plan*, and *Technology Plan*.

Rationale:

- › In order to stay relevant, planning documents must be regularly revisited and updated.
- › Developing a calendar of plans and how they are related to each other will help with efficiency, for example, completing an environmental scan that informs the development of all major planning documents.

Related Challenges:

- › Updating planning documents

Recommendations

ECONOMIC DEVELOPMENT AND CORPORATE TRAINING DIVISION (EDCT)

Background

The Economic Development and Corporate Training division (EDCT) is the economic developmental arm of the San Bernardino Community College District. The EDCT focuses on the serving the short-term workforce training needs of employers within the service area of the San Bernardino Community College District. The EDCT is currently independent of the Colleges and is in some ways independent from the District; The District provides some financial/administrative support through the Business and Human Resource Departments.

The primary clients of the EDCT are regional employers who request short-term customized training classes and community members who are either unemployed or underemployed. The focus of the training programs is to develop specific skills and competencies requested by employers and clients. The EDCT serves approximately 9,000 people a year with a budget of approximately \$28 million.

The fiscal stability of the EDCT is at times fluid, in that the organization depends upon receiving and acquiring state and federal competitive grants. The success of the EDCT is predicated on being nimble and flexible in order to meet the changing needs of

regional employers. Interacting with and supporting the Colleges is an area that historically has not been a priority for the EDCT.

Review and Analysis

The EDCT has been very successful in acquiring and implementing state and federal grants that service the short-term training needs of regional employers and the unemployed/underemployed population of the Inland Empire. The EDCT has also been successful at providing nimble and flexible workforce development to the area. The gauge of success has been measured by the number of clients serviced through the programs offered. Given that the funding of the EDCT is through the acquisition of state and federal grants, each grant has its own measure of success and accountability. EDCT staff indicated that each training grant was in essence an individual “contract” with the grant’s individual requirements.

Given the fluid nature of the EDCT’s fiscal stability and that the EDCT is primarily funded through short term grants, strategic and long-term educational planning becomes difficult. Because aligning itself with the goals of the District and its Colleges has not been a priority of the EDCT, it currently operates as a quasi-District educational entity.

Recommendation 1:

Each college should explore the EDCT as a resource to support grant development, contract education offerings, non-credit and not-for-credit courses and short-term vocational training opportunities.

Rationale:

- › Upon review of the *District Strategic Plan* and the strategic directions and goals of the Colleges, the EDCT as an organization has skill sets that may be beneficial in supporting the Colleges’ needs.
- › EDCT has the ability to be nimble and flexible in providing workforce development as well as the ability to successfully secure grant funding and support the educational and vocational training needs of the Colleges.

Recommendations

KVCR TV-FM, PUBLIC RADIO + TELEVISION

Background

KVCR is the San Bernardino Community College District's National Public Radio (NPR) and Television Station. KVCR was originally founded as a National Public Radio Station in 1952. A television station was later launched in 1963 through the Public Communication Act of 1963 and was part of the National Education Television (NET) network. KVCR became a Heritage NPR Station in 1971 when NPR was launched and is deeply rooted in the community of the Inland Empire.

KVCR is licensed by American Public Media to the San Bernardino Community College District. The Board of Trustees acts as the governing entity and the District provides the fiscal controls. KVCR produces content for the District as well as for partners within the community, such as the Rialto Police Department and the South Coast Air Quality Management District.

Although KVCR staff currently does not provide any direct academic instruction, the studios serve as teaching laboratories for students from the Radio, Television and Film Department at San Bernardino Valley College. The technical aspects of radio and television operation have gone through many changes. Perhaps,

the greatest change is the automation of the functions of the stations, resulting in fewer employees needed.

Review and Analysis

KVCR has been a positive member of the Inland Empire communication community. It is apparent that the television and radio stations are assets to the District that perhaps have not been completely realized. Upon review, the District's financial contribution to the operation of the stations has declined significantly over the last decade. This has partly been the result of the overall budget cuts within the District.

As the technical operations of the radio and television stations have become automated, the content of the programming has shown promise, such as the First Nations Experience (FNX) Native American programming, which is original content of KVCR. KVCR is the worldwide headquarters for FNX, the only nationally distributed TV channel exclusively devoted to Native American and World Indigenous content. There is an opportunity for KVCR to become more supportive of the educational fabric of the Colleges.

Recommendation 1:

Reevaluate the role and function of the radio and television station to operate as a fiscal asset that is an economically viable and self-sufficient entity. Develop a process for resource distribution between the District, EDCT, KVCR, and the Colleges.

Rationale:

- › KVCR is a cultural asset of the District. Although KVCR had been integrated with the Colleges in the past, currently there is very little integration. It might prove useful to reevaluate the role and function of the radio and television station to operate as a more economically viable entity. Additionally, KVCR may be useful in attracting partnerships with entities within the community to the Colleges and District.

District Facilities

This chapter focuses on the facilities that house District-level Administrative Services. These facilities are distributed among five District-owned sites and each is described in the following pages, as listed below. This chapter concludes with a summary of opportunities that have been identified for further exploration.

- › District Service Area
- › Local Context
- › District Facilities
 - › District Office Site
 - › District Annex
 - › 8th Street Annex
 - › District Facilities at SBVC
 - › District Facilities at CHC
- › Opportunities
- › Recommendations

District Facilities

DISTRICT SERVICE AREA

The SBCCD service area is characterized by geographical and geological diversity. Situated at the edge of the Inland Empire, it includes Cajon Pass, a gateway to the high desert, as well as a large portion of the San Bernardino Mountains. The abrupt transitions in regional geology result from the movement of tectonic plates as they grind past each other along the San Andreas rift zone. The rift zone passes through the SBCCD service area at Cajon Pass and along the southern edge of the San Bernardino Mountains. It is this movement that has lifted the San Bernardino and San Gabriel Mountains and set the stage for this region's role as a crossroads and destination.

These great transverse mountain ranges are barriers at the edge of the high desert that force travelers to choose among a few routes into the Inland Empire. As a crossroad on the routes from the north, through Cajon Pass, and the east, through Banning Pass, the San Bernardino Valley has long been a notable point along the route of travelers to coastal Southern California, as well as the home to people of many cultures. It continues to be a hub as successive transportation systems were built, including railroads, highways, and interstate highways. World War II brought the development of San Bernardino Army Air Field, which later became Norton Air Force Base. This facility is

currently the San Bernardino International Airport, which provides passenger, air cargo and logistics, general aviation, and aircraft maintenance services.

The SBCCD service area and sites are shown on the opposing page. The SBCCD sites include the campuses of San Bernardino Valley College and Crafton Hills College. These two college campuses are SBCCD's primary instructional sites. SBCCD District-level functions, including District-level Administrative Services, the Economic Development & Corporate Training division, and KVCR TV-FM television and radio station are housed in four locations—the District Office site, the District Annex, and facilities on both college campuses. SBCCD owns a building in downtown San Bernardino, called the 8th Street Annex that is currently not occupied.

District Facilities

LOCAL CONTEXT

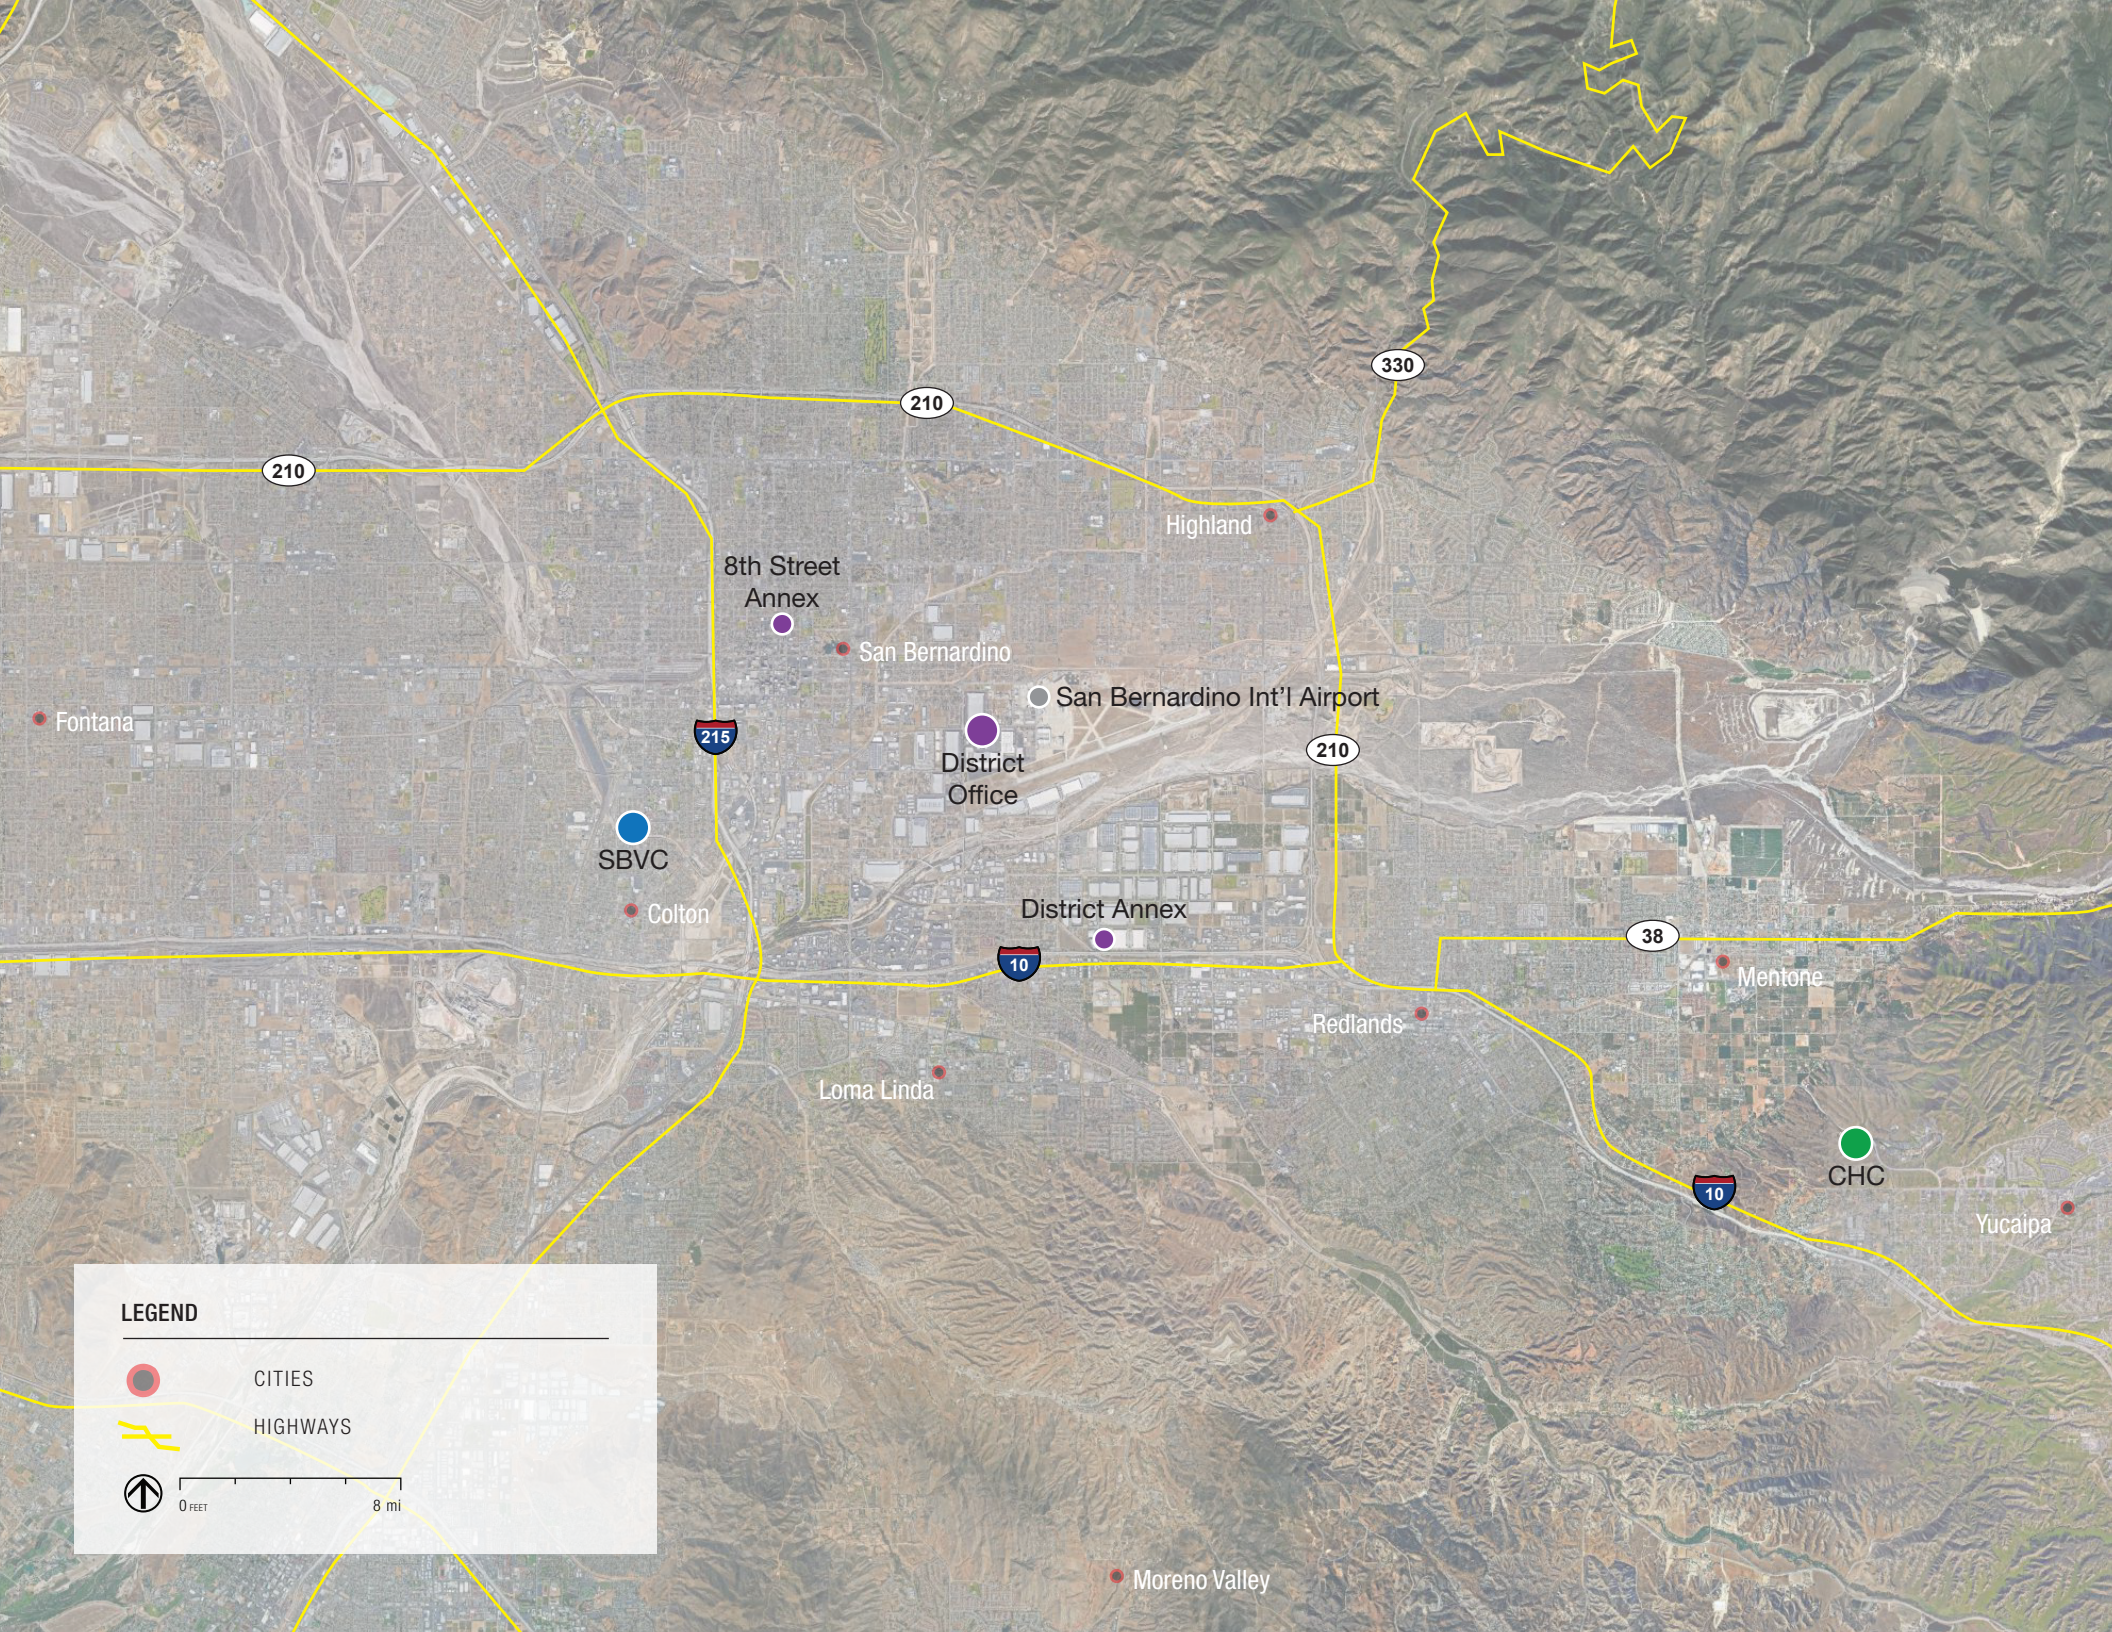

The graphic on the opposing page focuses on the portion of the SBCCD Service Area that lies within the San Bernardino Valley and contains the SBCCD sites.

The character of the western portion of the valley is wide open, encompassing well established urban and suburban development. San Bernardino Valley College is located in a suburban neighborhood within the City of San Bernardino at the boundary with the City of Colton. The 8th Street Annex is located in downtown San Bernardino.

In the central portion of the San Bernardino Valley, the former Norton Air Force Base and surrounding properties, as well as much former agricultural land, are being redeveloped for industrial, office, commercial and residential land uses. This is the neighborhood in which the District Office Site and the District Annex are situated. The District Office Site is located within the former base property and the District Annex is housed in a commercial business park within the western edge of the City of Redlands.

Eastward, the character of the geography shifts to low hills and smaller valleys encompassing towns, agriculture areas, and natural open space. Crafton Hills College is located in this area, situated on the Crafton Hills overlooking the cities of Redlands, Yucaipa, and Calimesa.

District Facilities

DISTRICT OFFICE — NEIGHBORHOOD CONTEXT

The District Office Site is centrally located between the Valley College and the CHC campuses on what was the San Bernardino Army Air Field. In 1950, the airfield became Norton Air Force Base, which housed major logistical and air maintenance operations until 1994, when it was realigned to civilian use. Following the remediation of environmental contamination, redevelopment of the former base moved forward under the Inland Valley Development Agency, the joint powers local base redevelopment authority. The flight facilities were repurposed and became the San Bernardino International Airport. The main public entrance to the airport is nearby to the east of the District Office Site.

The District Office Site's neighborhood is in transition. Since the early 2000s, land around the site has been redeveloped parcel by parcel, mainly by businesses that have built large manufacturing and product distribution centers, such as the nearby Stater Bros. and Mattel facilities. Public roadways and infrastructure are being improved to attract businesses and support new facilities. The City of San Bernardino also initiated the redevelopment of the Hospitality Lane District, which lies to the south of the District Office Site at the I-10 and includes many restaurant, retail, and lodging establishments, served by the sbX high-speed bus line. These positive changes are improving the neighborhood.

District Facilities

DISTRICT OFFICE — EXISTING SITE

The 8.39-acre District Office Site is composed of a section that abuts Del Rosa Boulevard, which SBCCD acquired and developed in the late 1990s, as well as an undeveloped portion of about 4 acres that was acquired in 2010. The site improvements on the developed portion include two permanent buildings, two surface parking lots, and paved plazas. The District Office Building at 114 S. Del Rosa Drive, opened in 2000. It contains 21,415 assignable square feet (ASF) and 26,800 overall gross square feet (OGSF). The Donald Averill Applied Technology Training Center (ATTC) at 124 S. Del Rosa Drive, opened in 2007. It contains 5,549 ASF and 9,731 OGSF.

These two facilities are in good condition. SBCCD participates in the California Community Colleges Facility Condition Assessment Program, which assesses existing buildings to help districts plan for maintenance and repair work. Each facility is assessed on many levels. In the most recent assessment, which was prepared in spring 2016, both the District Office Building and the ATTC were found to be in good condition. The results of the assessment align with information gathered from interviews with SBCCD staff.

The 4-acre undeveloped portion abuts the western boundary of the developed site. This portion has been cleared of buildings and other above ground site improvements. The portion of East Rialto Avenue that abuts the northern property line of this parcel is minimally improved. Information about the underground site conditions, such as existing utilities was not available for the preparation of the Districtwide Support Services Strategic Plan. It is likely that soil or groundwater contamination from military uses were remediated prior to acquisition by SBCCD, although site-specific information was not available.

District Facilities

DISTRICT OFFICE — ZONING

Two types of services are housed on the District Office Site—instructional services and District-level Administrative Services. 11,168 ASF of assignable space house instructional and instructional support services for the Economic Development and Corporate Training (EDCT) division of SBCCD. The District Office Site is well suited for training that involves students, such as incumbent workers that have less need to seek the services to be found on a full-service college campus. Students and business clients are attracted by the easy access, sufficient parking, flexible labs, and attractive, workplace-like atmosphere. EDCT offers training in the ATTC and in the Professional Development Center (PDC), which is situated in the northern wing of the District Office Building.

The District-level Administrative Services, including the offices of the Chancellor; Business and Fiscal Services; Office of Institutional Effectiveness, Research, and Planning; and Human Resources are housed in the south wing of the District Office Building. The Board Meeting Room is situated in the center of the District Office Building. These administrative functions occupy 10,363 ASF.

DISTRICT ANNEX

The District Annex is housed in leased commercial office space at 1289 Bryn Mawr Avenue, in the Redlands Corporate Center in Redlands, California 92374. SBCCD began leasing space for the District Annex on September 20, 2013 for a 5-year term. The monthly lease amount was \$11,124.10 for the first year and is set to increase by 3% every year; to be \$12,520.27 in the final year.

The District Annex is easily accessed from Interstate Highway 10, in the western portion of the City of Redlands. The District Annex contains 7,830 ASF and 11,110 OGSF in a single-story building that houses the offices of SBCCD Technology & Educational Support Services (TESS) and SBCCD Printing Services. Shared parking is available next to the building. The District Annex was previously housed in the 8th Street Annex in downtown San Bernardino.

8TH STREET ANNEX

The 8th Street Annex is an SBCCD-owned property in downtown San Bernardino at 441 West 8th Street, San Bernardino, California 92401. The property contains a single-story building and a parking lot. This facility was built in 1988. The building contains 6,265 ASF and 8,771 OGSF. This facility is currently not in use and is classified as inactive space in the space inventory. The most recent facilities condition assessment, which was prepared in spring 2016, found the 8th Street Annex to be in need of minor renovation work.

District Facilities

DISTRICT FACILITIES AT SBVC

The following facilities at San Bernardino Valley College house SBCCD District-level functions:

KVCR Studio in the Media & Communications Building

The Media & Communications building houses studios for the KVCR public television and National Public Radio (NPR), operating under an American Public Media license. This facility also houses the world-wide headquarters of FNX, the First Nations Experience network. The radio station began broadcasting in 1952 and became a heritage station when NPR was launched in 1971. Television broadcasts began in 1963, as part of the National Educational Television (NET) network. KVCR became a heritage station when PBS was launched.

The KVCR studio occupies 9,403 ASF of the total 12,527 ASF in the Media & Communications Building. The remaining 3,124 ASF serve as Valley College instructional space for Radio, TV, Video, and Film (RTVF) courses. The KVCR studios also function as a teaching lab for RTVF courses.

The Media & Communications Building has good visibility and direct vehicular access from Grant Avenue

and parking in Parking Lot 11. KVCR's broadcast antenna is situated to the north of the building and is very visible to the surrounding community.

The Media & Communications Building opened in 2010 and is in good condition, however, issues with the facilities have been identified that involve acoustics and sound proofing, space that should be utilized more efficiently, and communication cabling linkages within the facilities. To keep up with the industry, specialized equipment and technology will be due for an update in the near term.

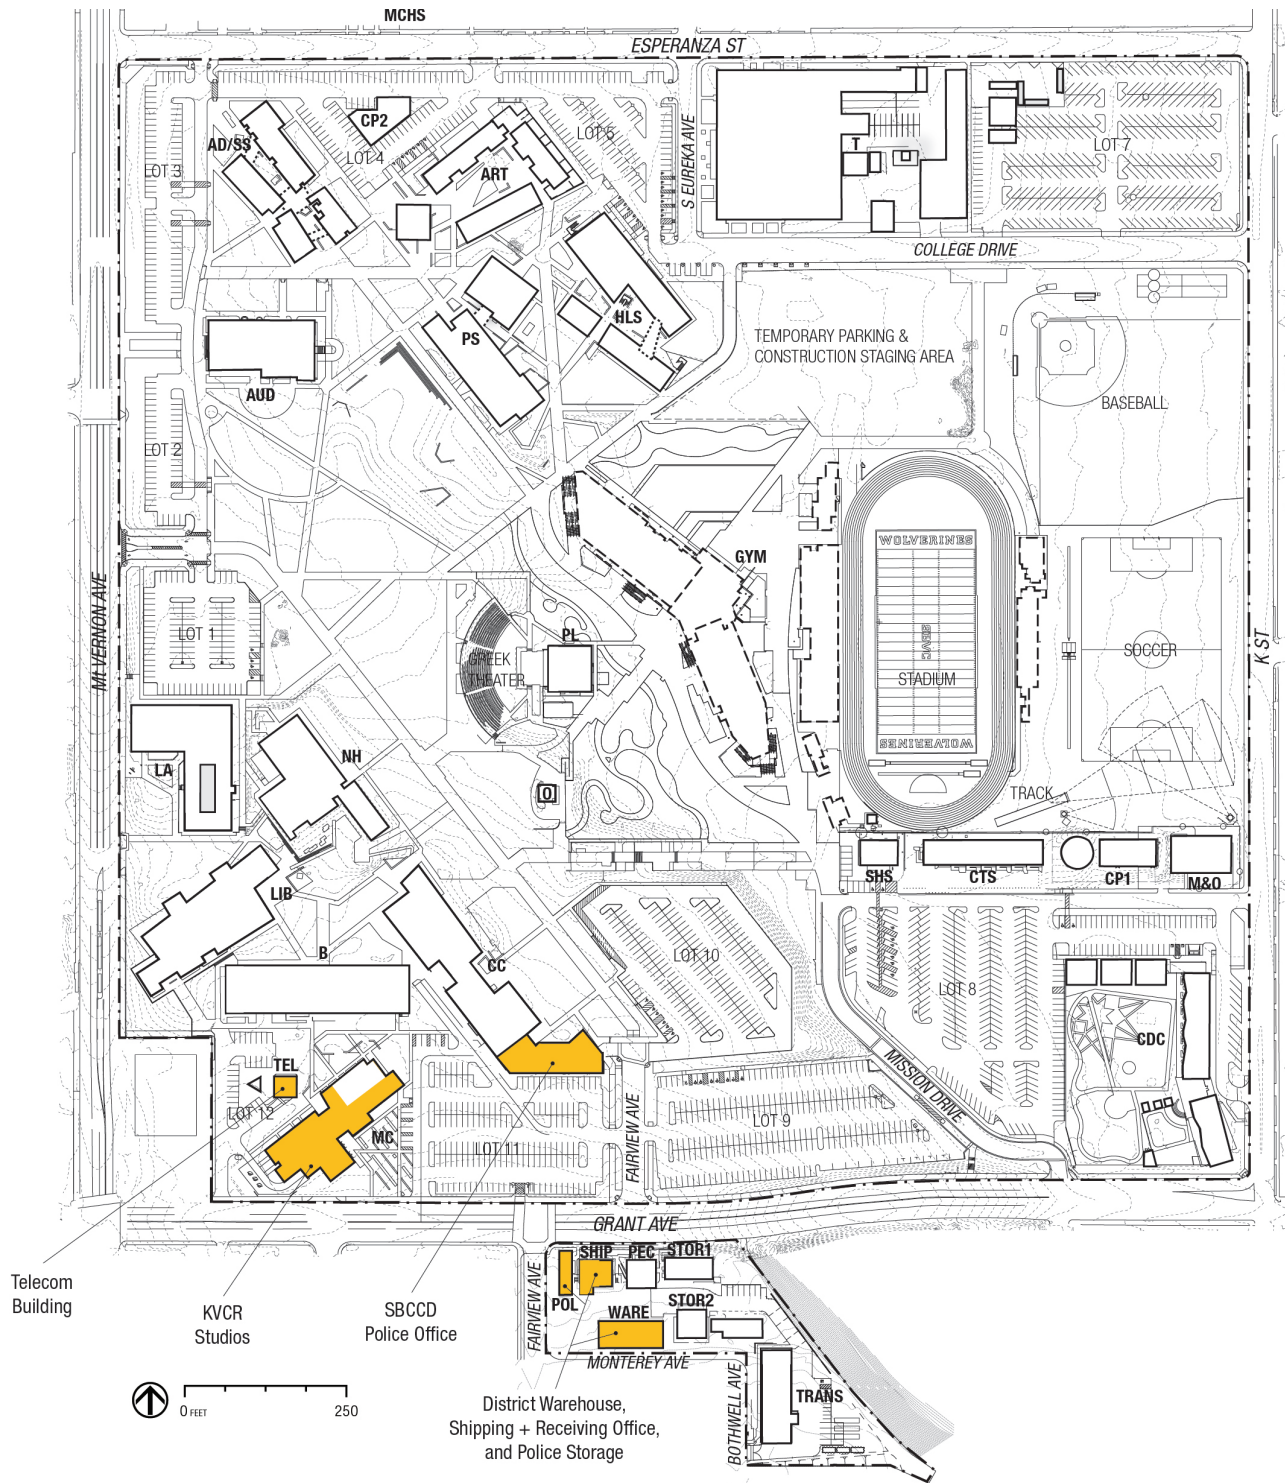

District-wide Telecommunication Gateway in the Telecom Building

The Telecom Building was put into service in 2004. It holds telecommunication equipment that links all SBCCD sites to the District's communication service providers.

District Police Office in the Campus Center

The SBVC Police Office is the base of operations for a post-trained police sergeant and campus security officers (CSOs), as well as a dispatcher and administrative staff who serve the Valley College campus. The District Police Office is located at the

southern end of the Campus Center. The Police Department has dedicated use of the adjacent enclosed and gated parking area. This facility, which is conveniently located adjacent to a primary vehicular route, a primary campus gateway, and The Glade, has been serving its purpose well.

DISTRICT FACILITIES AT SBVC *(cont.)*

Police Storage Building

This facility in the Fairview Precinct was constructed in 1935 for the Fairview School that occupied this site until it was acquired by SBCCD in 1963. This single-story building has been minimally a Districtwide Support Services Strategic Plan as storage space for the District Police Department. The facility is not universally accessible. The replacement of storage space for the SBCCD Police Department within a new District Warehouse is recommended in the SBVC Comprehensive Master Plan.

Shipping & Receiving Buildings

This facility in the Fairview Precinct was constructed in 1935 for the Fairview School that occupied the site until it was acquired by SBCCD in 1963. This two-story facility has been minimally a Districtwide Support Services Strategic Plan for the functions that it current serves. The SBCCD shipping and receiving offices and several Technology & Educational Support Services (TESS) offices occupy the upper floor. The ground level space is used for storage by the College. It is likely that the floor/ceiling assembly that separates the ground-level and upper-level spaces does not comply with the building code requirement for a fire resistive assembly. The facility, including building entrances and

restrooms, is not universally accessible. In the most recent facilities condition assessment, it was found to be in fair condition. The replacement of the Shipping and Receiving Office is recommended in the SBVC Comprehensive Master Plan.

District Warehouse

The warehouse is an aged modular building that was erected in 1960 and is in poor condition. It does not have a loading dock or covered loading area. The shipping and receiving office is in a separate building, complicating supervision by staff. The replacement of the District Warehouse is recommended in the SBVC Comprehensive Master Plan.

District Facilities

DISTRICT FACILITIES AT CHC

The following facilities at Crafton Hills College house SBCCD District-level functions:

District Police Office in the Central Complex

The CHC Police Office is the base of operations for a post-trained police sergeant and campus security officers (CSOs), as well as a dispatcher and administrative staff, who serve the CHC campus. The police office, which is currently being renovated, is located on the ground floor with its entrance facing north toward Parking Lot E. Parking for police vehicles is provided in Lot E. This facility, which is conveniently located adjacent to Campus Drive and the Main Quad, at the center of campus, has been serving its purpose well.

SBCCD Construction Office Housed in a Temporary Building in Lot P

This temporary building and the adjacent temporary offices for SBCCD's construction manager, Kitchell-BRJ, are well located to support construction projects that will be completed in 2018. These offices are close to the construction project sites, but hidden from view behind the Performing Arts Center. It is anticipated that these buildings will be removed in the near term and that this site will revert to its original function as

parking. A portion of this area will become the location of an addition to the Performing Arts Complex, as recommended in the CHC Comprehensive Master Plan. This addition will provide storage space and a receiving area for deliveries.

District Facilities

OPPORTUNITIES

Through district-wide planning discussions, these opportunities were considered and recommended for further exploration.

District Office Building

The 4-acre undeveloped portion of the District Office Site presents the opportunity to consolidate District functions that would benefit from being co-located into one facility. Measure M originally reserved \$22,000,000 for such a project. On August 12, 2010, the Board of Trustees approved the development of space programming for a new District building that would allow all District-level Administrative Services to be centrally located. The new building was intended to house the offices of Technology and Educational Support Services (TESS) and Printing Services. The project would also have included the SBCCD Warehouse and Shipping and Receiving Office, allowing those functions to move out of the Valley College campus. Vacated space in the District Office Building would be repurposed for instructional use, as intended under the terms of the workforce development grant that funded the construction of this building.

In July 2011, due to the fiscal climate that did not permit the sale of the full scope of Measure M bonds, as well as the District's desire to direct funds toward campus building projects that directly benefit students, this project was postponed.

The *Districtwide Support Services Strategic Plan* recommends revisiting the opportunity to consolidate District-level Administrative Services and remove the need to lease space for SBCCD Technology & Educational Support Services and Printing Services. With this opportunity comes the potential to return the existing District Offices to instructional use, if this action aligns with district-wide strategic planning in the future.

Relocating the District Warehouse and Shipping and Receiving Office to this site is not recommended, because the location at the San Bernardino Valley College campus provides an efficient staging and logistics site for that campus, which contains 59% of SBCCD space. For this reason, the replacement of the District Warehouse and Shipping and Receiving Office is recommended in the SBVC Comprehensive Master Plan.

8th Street Annex

(Opportunities for the 8th Street Annex will be explored during discussions that will occur during the fall 2016 semester.)

District Facilities

RECOMMENDATIONS

The *District Needs & Institutional Support Plan* recommends the following actions to support the implementation of San Bernardino Valley College's and Crafton Hills College's facilities master plans.

District-wide Facilities Project Implementation

The CHC and Valley College CMPs set forth the prioritization for facilities project implementation that is recommended by each college council. The Districtwide Support Services Strategic Plan recommends that district-wide prioritization of facilities projects for the Colleges and SBCCD District Office be vetted through collaborative consensus decision-making by the SBCCD District Strategic Planning Committee, who will consider the results of implementation studies and the alignment of projects with the District Strategic Plan to arrive at a recommended priority list.

Implementation Planning

An implementation plan for each campus is recommended to prepare for the orderly and timely implementation of each college's FMP. This important step is intended to prompt decision-making, planning, scheduling, and budgeting at a more detailed level and to prepare for the design and construction phases of individual projects. An implementation plan will

create a detailed long-range vision that is linked to design standards and objectives, including goals for sustainability. It will include a multi-discipline study of the campuses' utilities infrastructure systems that must be ready to support each new facility. It will plan for occupant move logistics and temporary housing when needed. It will position SBCCD to make best use of potential funding opportunities.

A key step that is required by accreditation standards is planning for the life-cycle and operational costs of all facilities and campus-wide systems. Only by doing this can SBCCD expect to maintain and refresh its campuses over time, at the level of quality that the community deserves and has come to expect.

Site Utilities Infrastructure Studies

A comprehensive utilities infrastructure study is recommended as the next step to support future facilities with vital services and prepare and budget for efficient and sustainable campus operations. The campus utilities infrastructure will be mapped and assessed with regard to condition and the capacity to respond to planned needs. The college FMPs will serve as the basis to estimate and plan for future needs. The study will begin by thoroughly mapping,

documenting, and assessing the condition and capacity of all existing systems. It will model future needs and plan for improvements to the campuses' space heating and cooling, power (including increasing site generated power), natural gas, communications, potable water, expanded use of non-potable irrigation water where available, sewer, and storm water management systems. It will consider emerging technologies and infrastructure systems that support the efficient use of resources and reduce the campuses' environmental impacts. It will plan for compliance with recently enacted water quality regulations that have applied more stringent requirements for retention and treatment to college projects, as well as regulations that require a campus sewer management plan for each campus. It will estimate the budgets and timeframes needed to accomplish this work.

District Facilities

RECOMMENDATIONS *(cont.)*

District Space Standards and Design Guidelines

Before the next building is designed, the DNISP recommends that space standards and design guidelines be established. District-wide space standards, especially for offices, classrooms, conference and meeting rooms, and other typical room types, can help to remove guesswork during design, implement best design practices, promote consistent and equitable allocation of space, improve utilization, facilitate coordination with instructional technology and furnishings, and help to move the space inventory into better alignment with Title V standards. Design guideline that are flexible and based on a foundation of widely valued design principles and proven practical maintenance and operational principles can promote a harmonious campus aesthetic and improve the experience of all who learn and work on the campus. Benefits come through many aspects such as consistent way finding; universal accessibility; sustainable, durable, and healthy environments; and prioritization of intellectually and socially stimulating and student-focused campuses. Certain aspects of the design guidelines would apply to both campuses and all sites, while others would be specific to a single campus and its unique aesthetic qualities.

Sustainability Planning

Continued sustainable facilities planning is recommended to build upon CHC's and Valley College's successes and set milestones toward achieving net-zero energy usage and other sustainability goals that relate to areas such as water, transportation, healthy environments, optimal learning conditions, and waste management. The plan would assess the current state of sustainability at SBCCD, update goals and objectives, and explore strategies and timelines to move SBCCD toward its goals, including a realistic exploration of feasible steps to prepare for net-zero campuses.

SBCCD faculty, staff, and students have expressed their enthusiasm and ideas for sustainability and environmental stewardship. Next step strategies that have been suggested during master planning discussions include:

- › Ultra-efficient building design standards
- › Micro-grid and battery storage
- › Fuel cell electrical generation
- › Sub-metering of all systems
- › Online dashboard that shows power generation and power usage
- › Retro-commissioning on a 3- to 5-year cycle

Appendix A: Internal District Profile— Additional Characteristics

Internal District Profile—Additional Characteristics

STUDENT DEMOGRAPHICS

From 2010-11 to 2014-15, students in the 20-24 age group accounted for an average of 35.5% of enrollment (8,889 students), while students age 19 and under accounted for an average of 26.3% of enrollment (6,587 students), and students 25-29 years old accounted for an average of 14.59% of enrollment (3,662 students). The only age group to increase in enrollment during the five academic years from 2010-11 to 2014-15 was students 20-24 years old (257 students). The age groups that experienced the most decline during the same period were from students age 19 or younger (-783 students) and students 40-49 years old (-657 students).

Exhibit A.01 Enrollment by Age Group

From 2010-11 to 2014-15, Hispanic students at the District increased from 47.02% of enrollment to 57.15% of enrollment, an increase of 1,496 students. Conversely, Caucasian students decreased from 28.58% of enrollment to 22.2% of enrollment, a decrease of 2,310 students. During the same time, African American students decreased by 974 students, Asian students decreased by 323 students, and students identifying themselves as two or more races increased by 169 students.

STUDENT DEMOGRAPHICS *(cont.)*

From 2010-11 to 2014-15, females accounted for an average of 54.1% of enrollment (13,575 students), while males accounted for an average of 45.76% of enrollment (11,463 students). During the same time, females decreased by 1,133 students (-7.39%) while males decreased by 1,222 students (-9.66%).

Exhibit A.03 Enrollment by Gender

Source: SBCCD Office of Institutional Effectiveness, Research & Planning, from the local District SIM 2015

California (CA) residents accounted for an average of 96.27% of enrollment in the SBCCD from 2010-11 to 2014-15. During the same time, enrollment of California residents decreased by 2,812 students (-10.3%). From 2010-11 to 2014-15, CA non-resident (AB 540) students increased by 484 students (149.38%) while foreign country resident enrollment increased by 81 students (30.57%).

Exhibit A.04 Enrollment by Residency Status

Residency Status	2010-2011	2011-2012	2012-2013	2013-2014	2014-2015

Planning Environment - Internal District Profile

STUDENT DEMOGRAPHICS *(cont.)*

From 2012-13 to 2014-15 (the most recent period of growth), continuing students accounted for an average of 61.85% of enrollment (15,086 students), while returning college students accounted for an average of 16.31% of enrollment (3,956 students), and first-time college students accounted for an average of 10.64% of enrollment (2,571 students). During the same three year period, enrollment from continuing students increased by 3,203 students (23.07%) and by 95 students (7.16%) from under 18 (or K-12 special admit) students. However, enrollment from first-time college students decreased by 823 students (-29.73%) and by 349 students (-8.81%) for returning college students.

Exhibit A.05 Enrollment by Enrollment Status

Source: SBCCD Office of Institutional Effectiveness, Research & Planning, from the local District SIM 2015

In 2014-15, 63.75% of students in the District (16,367 students) stated that their educational goal was to obtain a bachelor's degree (BA/BS) upon transfer. During the same academic year, 17.25% of students (4,430 students) had an educational goal of obtaining an associate's degree (AA/AS) or certificate without transfer, and 6.46% of students (1,659 students) identified their goals as related to job skills or maintaining a certification/license.

From 2010-11 to 2014-15, the proportion of students with the goal of obtaining a BA/BS increased by 11.56% (1,743 students). During the same time, the proportion of students with goals related to job skills or maintaining a certification/license decreased by 4.45% (-1,398 students). It should also be noted that the number of students with an undecided goal decreased by 191 students during the same time period.
